(57) **CLAIM**

I claim the ornamental design for a bracket for fencetop barrier, as shown and described herein.

DESCRIPTION

FIG. 1 shows a left front perspective view, from above, of the bracket for a fencetop barrier, wherein the bracket is shown relative to how it might be installed on an exemplary fencepost to support such a barrier. The fence and barrier elements, as well as the additional exemplary bracket mounted to an adjacent post, are all illustrated in broken lines indicating that they represent environment only and form no part of the claimed design.

FIG. 2 is a left front perspective view, from above, of the bracket for a fencetop barrier.

FIG. 3 is a top view of the bracket.

FIG. 4 is a bottom view of the bracket.

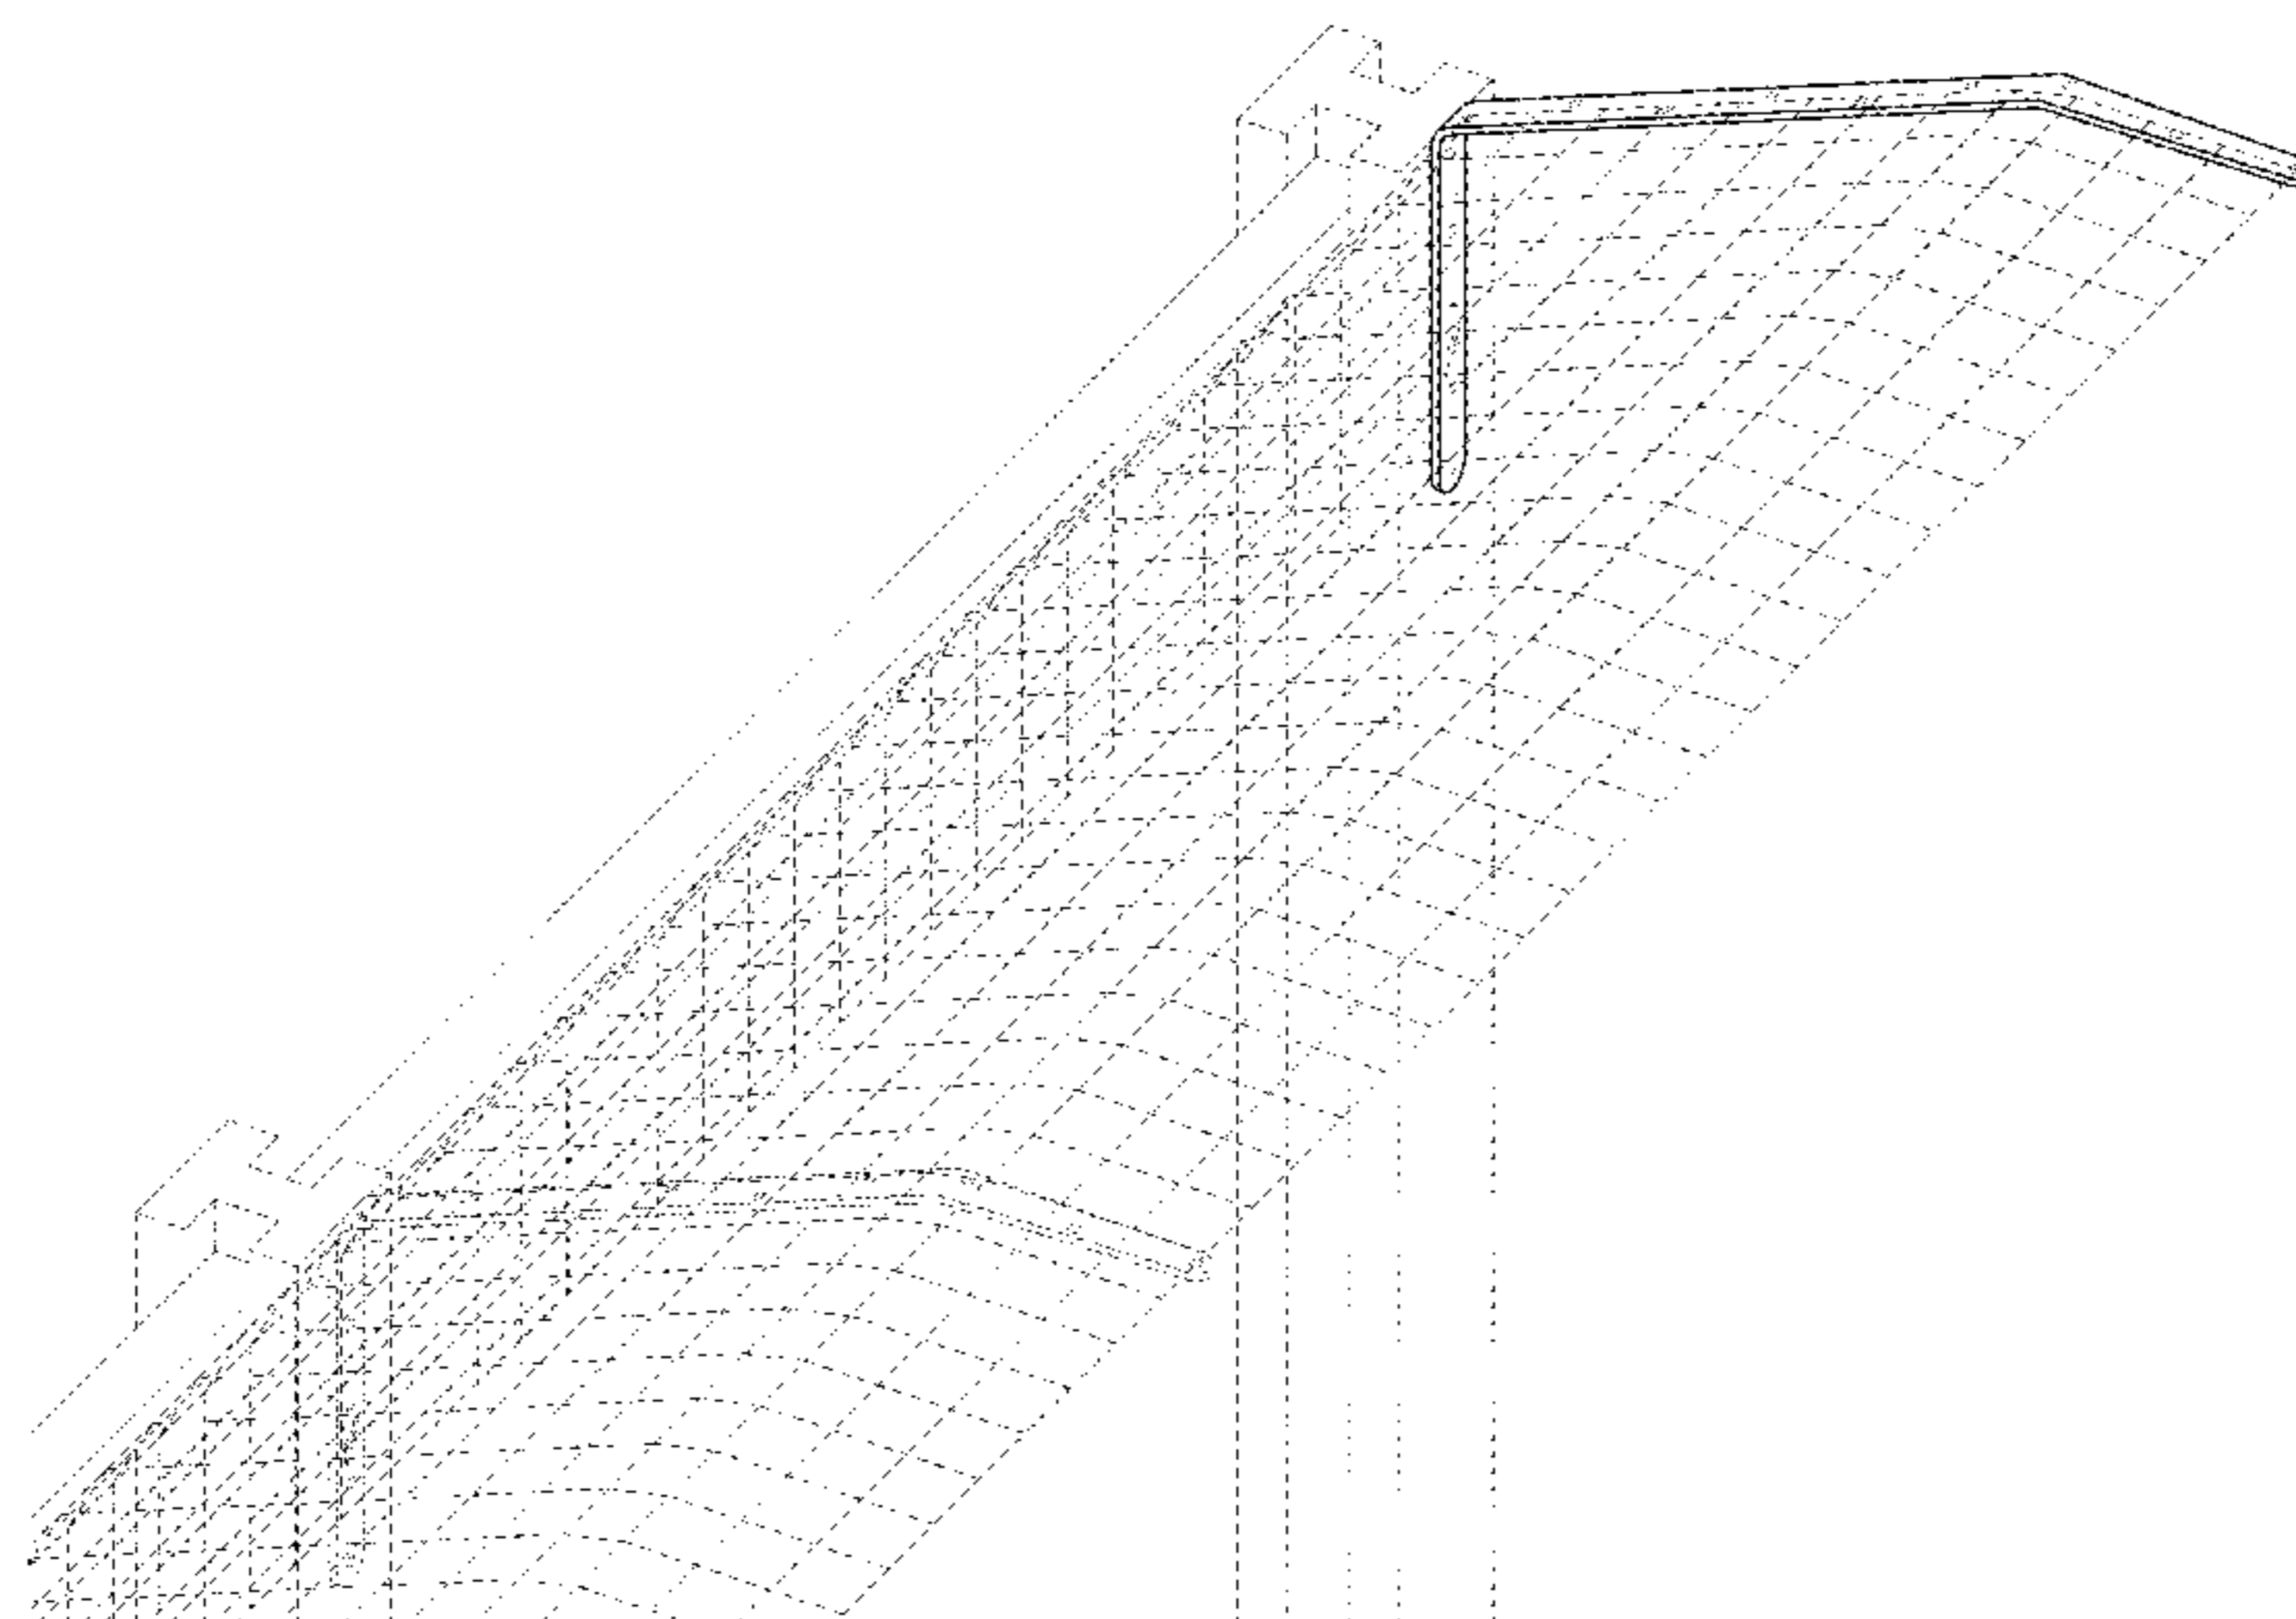

FIG. 5 is a left side view of the bracket. Other than the openings in the bracket, which are illustrated in broken lines, the bracket has left-to-right mirror-image symmetry.

FIG. 6 is a rear view of the bracket; and,

FIG. 7 is a front view of the bracket.

In addition to illustrating environment as in FIG. 1, explained above, broken lines in the drawings also illustrate features of the bracket that form no part of the claimed design.

1 Claim, 5 Drawing Sheets
