(57) **CLAIM**

The ornamental design for a snow globe soap bottle, as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front side elevation view of a snow globe soap bottle with a striped tube embodying our new design in which the particles are settled; and,

FIG. 2 is a front side elevation view thereof in which the particles are suspended some time after agitation, in which the particles partially obscure the striped tube.

There are no top, bottom, left, right, or rear elevational views, as the ornamental features of the design are either not claimed or not seen from those perspectives.

The broken line showing is for illustrative purposes only, and forms no part of the claimed design.
