(57) **CLAIM**

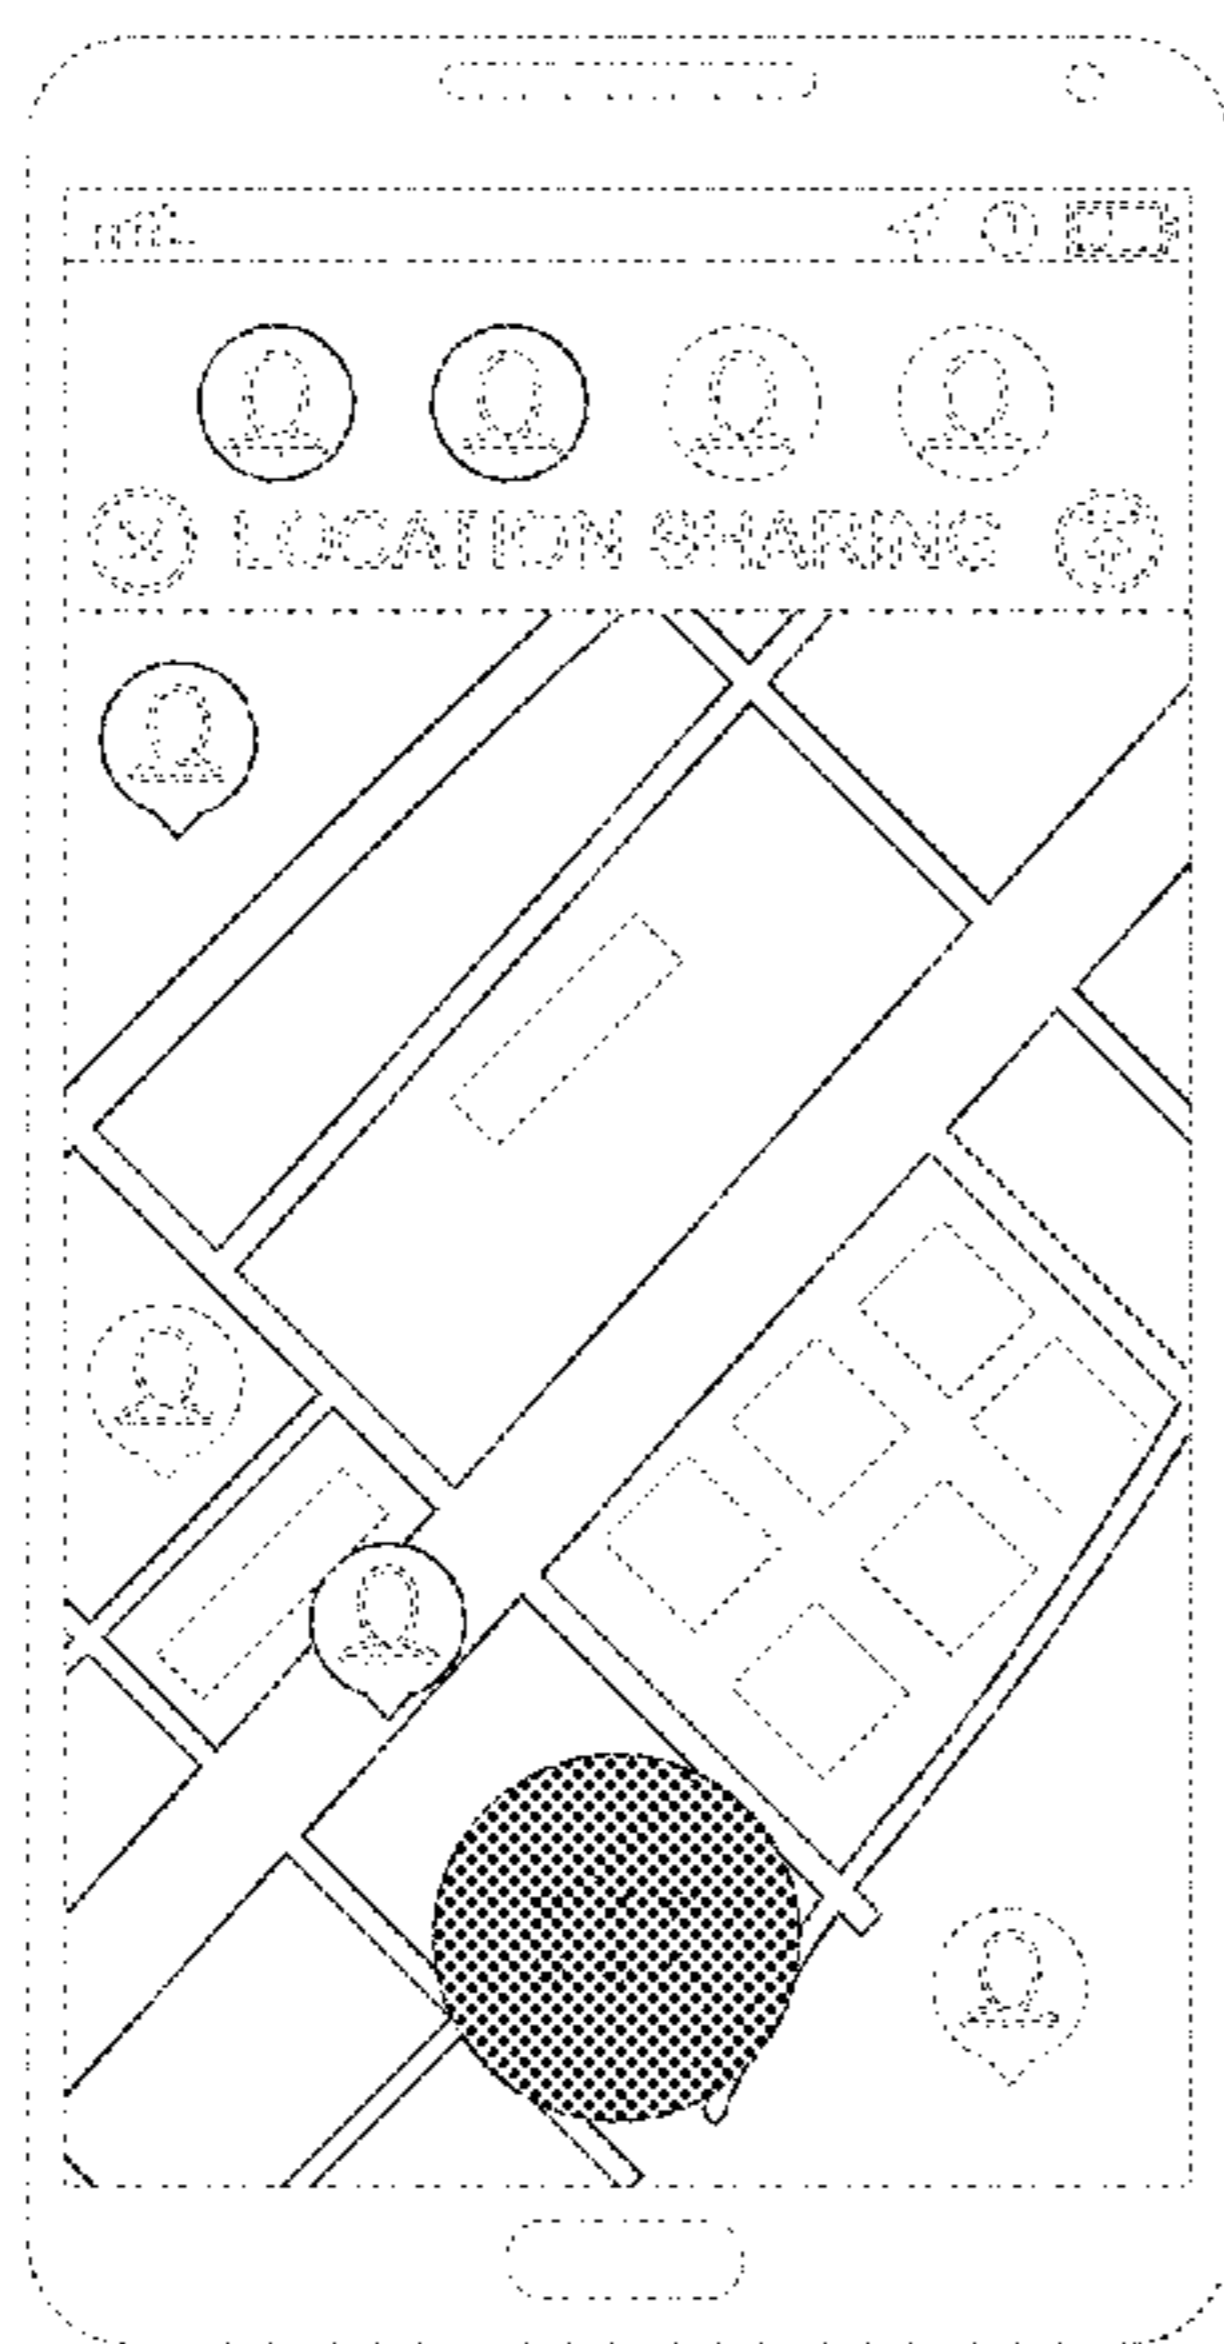

The ornamental design for a display screen portion with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the first image in a sequence of a display screen portion with animated graphical user interface showing our new design; and, FIG. 2 is a front view of a second image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 and 2. The process or period in which one image transitions to another image forms no part of the claimed design. The broken line showing of a portion of a display screen forms no part of the claimed design. The broken line showing of text and portions of the graphical user interface represents environmental subject matter and forms no part of the claimed design. The greyscale fill shown in portions of the figures indicates that the regions in which the greyscale fill appears represent a contrasting appearance to the areas of the claimed design that do not contain greyscale fill.

1 Claim, 2 Drawing Sheets
