(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. **1** is the first image in a sequence for a first embodiment of a display screen with transitional graphical user interface showing our new design;
FIG. **2** is the second image thereof;
FIG. **3** is the third image thereof;
FIG. **4** is the fourth image thereof;
FIG. **5** is the fifth image thereof;
FIG. **6** is the sixth image thereof;
FIG. **7** is the seventh image thereof;
FIG. **8** is the first image in the sequence of a second embodiment for a display screen with transitional graphical user interface showing our new design;
FIG. **9** is the second image thereof;
FIG. **10** is the third image thereof;
FIG. **11** is the fourth image thereof;
FIG. **12** is the fifth image thereof;
FIG. **13** is the sixth image thereof; and,
FIG. **14** is the seventh image thereof.

The features shown in broken lines in the drawings depict environmental subject matter only and form no part of the claimed design. The dash-dotted lines denote the boundary of the claim and form no part of the claimed design. The appearance of the transitional image sequentially transitions between the images shown in FIGS. **1-7** for the first embodiment and the appearance of the transitional image sequentially transitions between the images shown in FIGS. **8-14** for the second embodiment. The process or period in which one image transitions to another image forms no part of the claimed design.

The claimed portion is enclosed by the outermost solid lines, which form part of the claimed design, and the dash-dotted lines, which denote the boundaries of the claimed design in the drawings.
