(57) **CLAIM**

The ornamental design for a display screen or portion thereof with a transitional graphical user interface, as shown and described.

DESCRIPTION

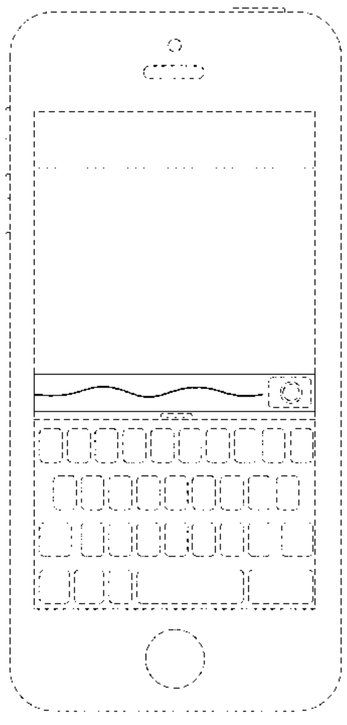
FIG. **1** is a face view of a display screen or portion thereof with a transitional graphical user interface, showing my new design, according to a first embodiment and illustrating a first image thereof.

FIG. **2** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating a second image thereof.

FIG. **3** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating a third image thereof.

FIG. **4** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating a fourth image thereof.

FIG. **5** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating a fifth image thereof.



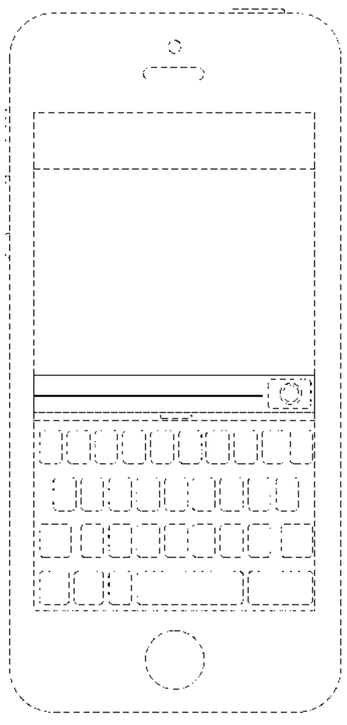


FIG. **6** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating a sixth image thereof.
FIG. **7** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating a seventh image thereof.
FIG. **8** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating an eighth image thereof.
FIG. **9** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating a ninth image thereof.
FIG. **10** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating a tenth image thereof.
FIG. **11** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the first embodiment and illustrating an eleventh image thereof.
FIG. **12** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to a second embodiment and illustrating a first image thereof.
FIG. **13** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating a second image thereof.
FIG. **14** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating a third image thereof.
FIG. **15** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating a fourth image thereof.
FIG. **16** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating a fifth image thereof.
FIG. **17** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating a sixth image thereof.
FIG. **18** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating a seventh image thereof.
FIG. **19** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating an eighth image thereof.
FIG. **20** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating a ninth image thereof; and,
FIG. **21** is a face view of a display screen or portion thereof with a transitional graphical user interface, according to the second embodiment and illustrating a tenth image thereof.
The appearance of the transitional icon in the graphical user interface sequentially transitions among the images shown in FIGS. **1-11** or among the images shown in FIGS. **12-21**.
The process or period in which any image transitions to another image forms no part of the claimed design.
The broken lines represent portions of the display screen and graphical user interface and form no part of the claimed design.
