(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is the first image in a sequence for a display screen with animated graphical user interface showing our new design; and,

FIG. 2 is the second image thereof.

The difference in shading indicates a contrast of appearance and does not depict any particular color, texture, or material. The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-2. The process or period in which one image transitions to another forms no part of the claimed design. The broken line showing of the display screen, text, and graphic features forms no part of the claimed design.
