The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is the first image in a sequence for a display screen with animated graphical user interface showing my new design;

FIG. 2 is the second image thereof;

FIG. 3 is the third image thereof;

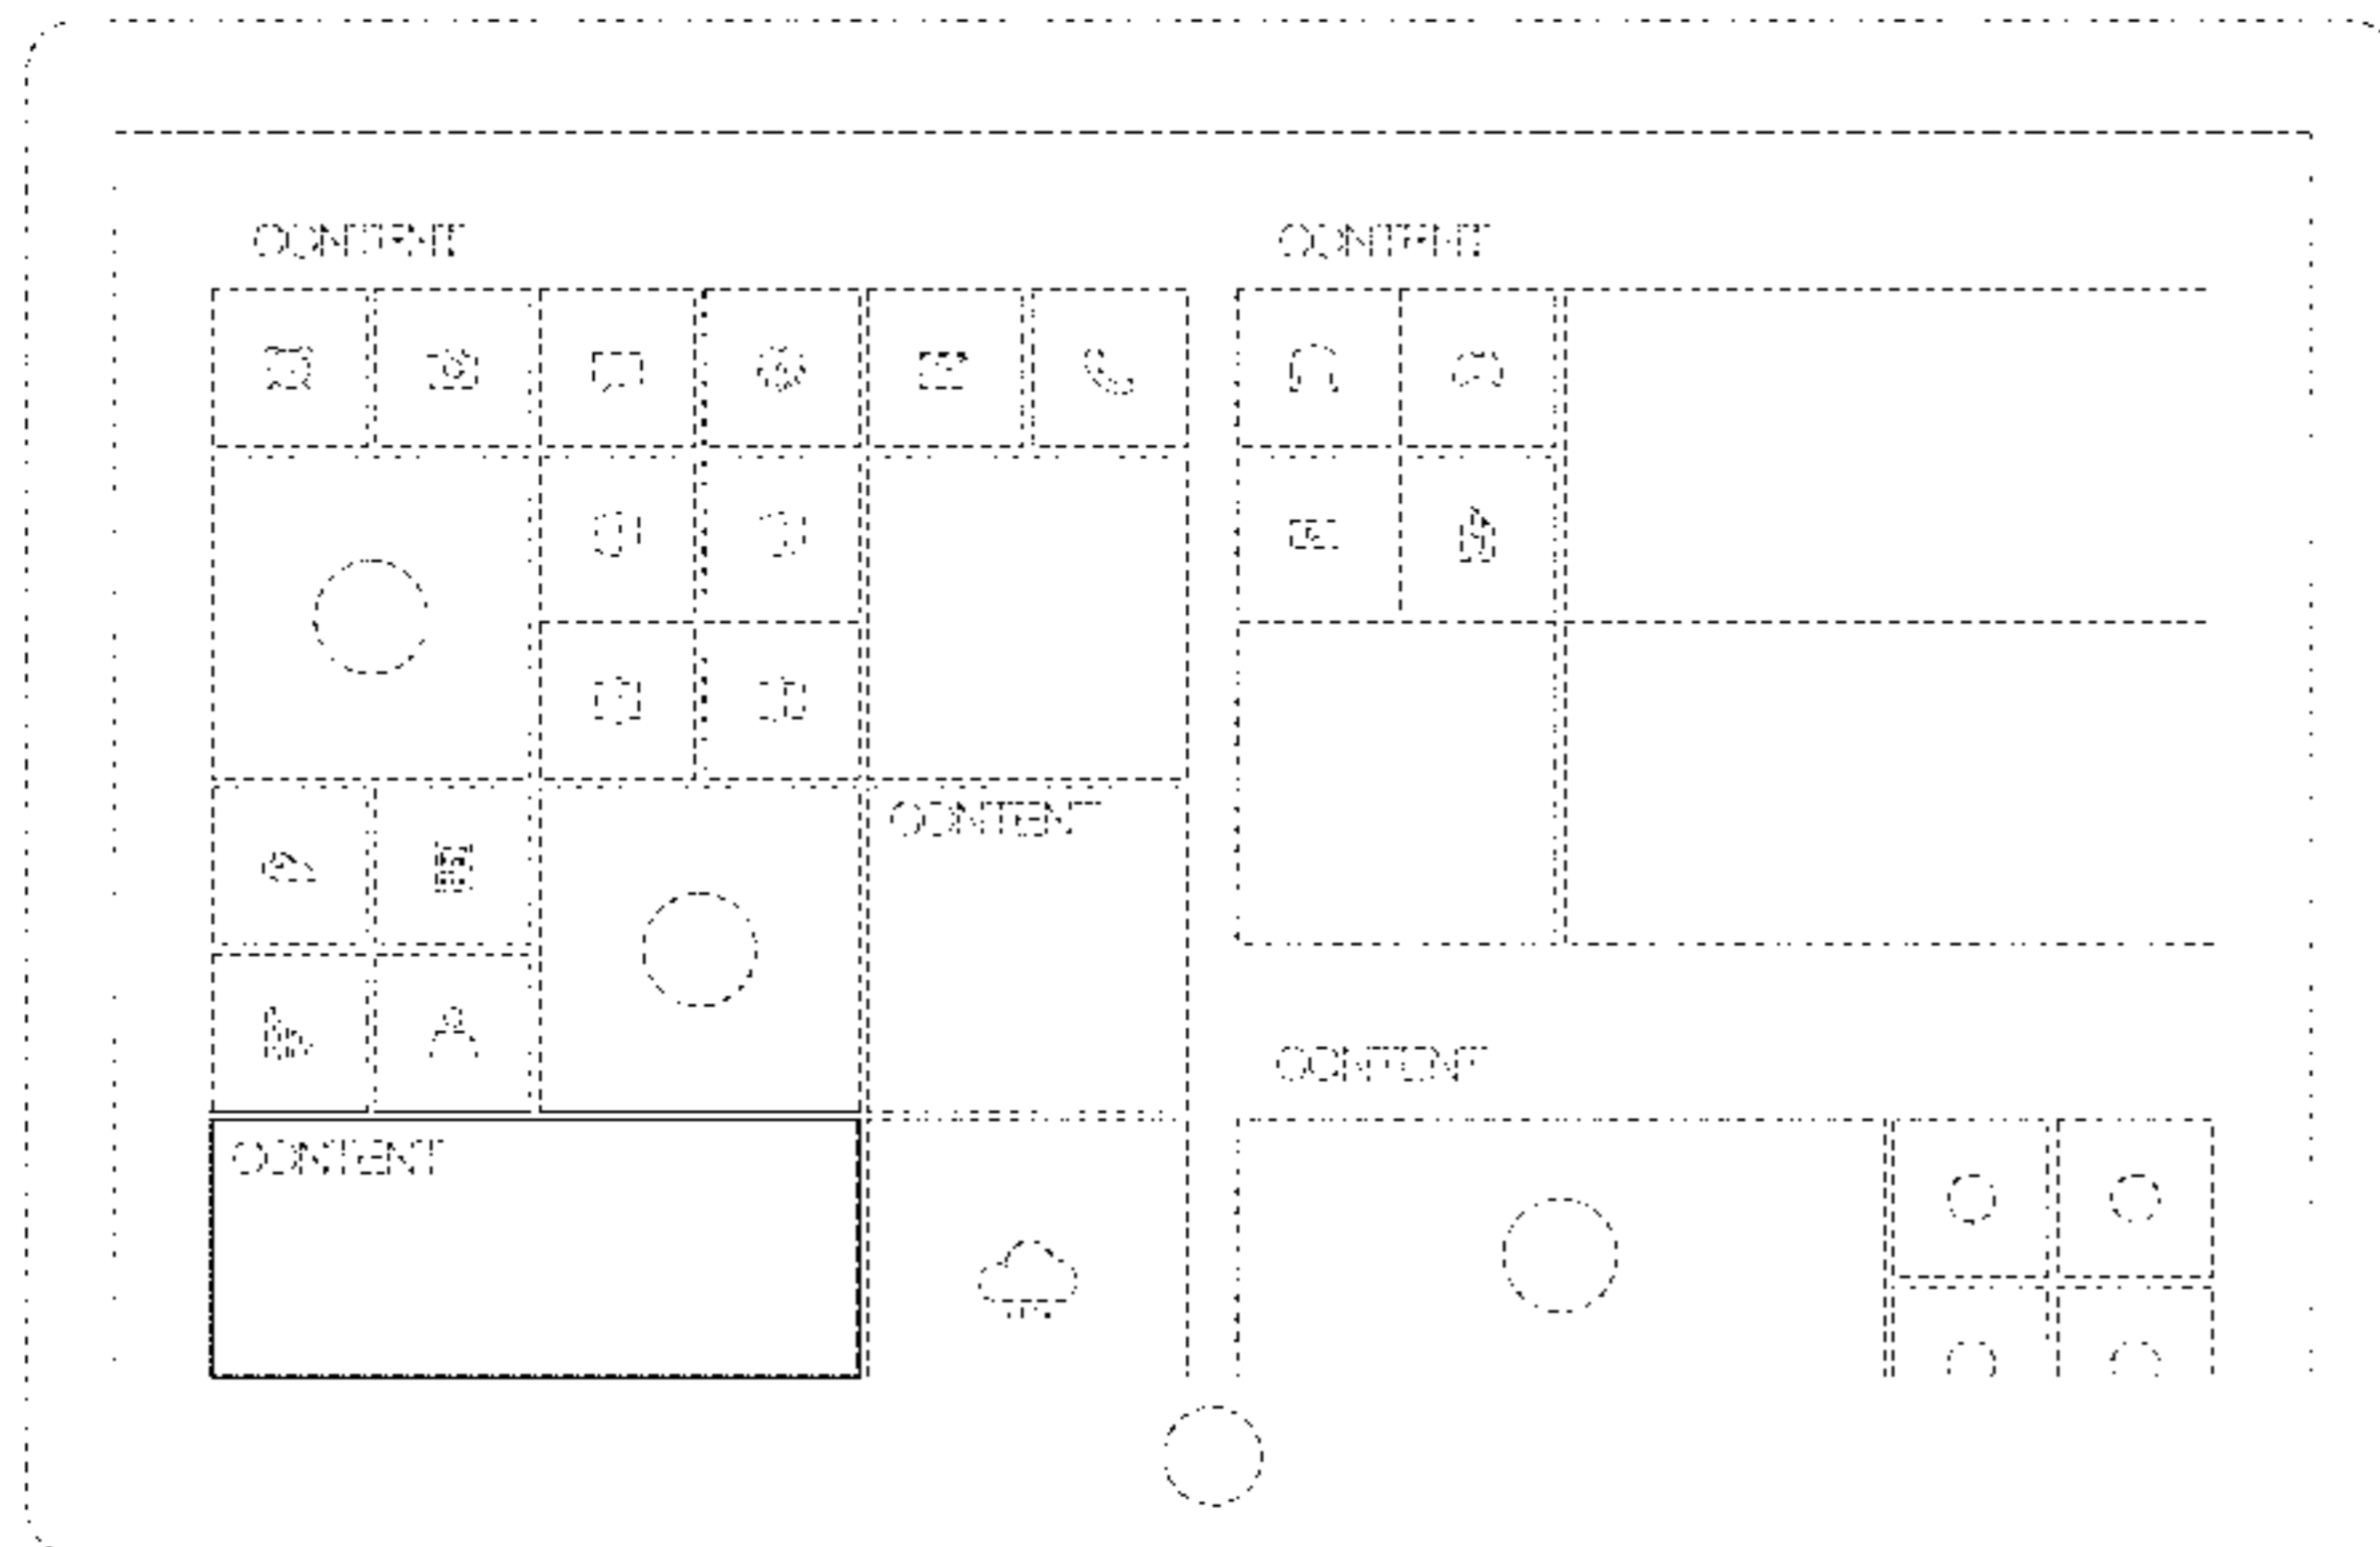

FIG. 4 is the fourth image thereof; and,

FIG. 5 is the fifth image thereof.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-5. The process or period in which one image transitions to another forms no part of the claimed design.

The claim is directed toward the rectangle and three lines shown in FIGS. 1-2, and the rectangle with two circles and three lines shown in FIGS. 3-5. The even-length broken line showing of an electronic device illustrates environmental structure and forms no part of the claimed design. The remainder of the even-length broken lines, including all of the text and all of the icons, illustrate portions of the graphical user interface and form no part of the claimed design. The uneven-length broken line illustrates a portion of the display screen and forms no part of the claimed design.
