(57) **CLAIM**

The ornamental design for an artificial inseminator, as shown and described.

DESCRIPTION

FIG. 1 is an environmental side view of an artificial inseminator in accordance with our new design, shown in use.
FIG. 2 is a perspective view of the artificial inseminator.
FIG. 3 is another perspective view thereof.
FIG. 4 is a side view thereof, the opposite side being a mirror image.
FIG. 5 is a first end view thereof; and,
FIG. 6 is an opposite, second end view thereof.
The main body of the inseminator is shown with a symbolic break in its length. The appearance of any portion of the article between the break lines forms no part of the claimed design.
The broken line showing of an animal in FIG. 1 is exemplary only, and forms no part of the claimed design.
The design is for an insemination device which is used to artificially inseminate small animals such as dogs. One end of the inseminator is inserted into the vagina of the animal. The opposite end is connectable to a source of semen via a syringe or the like.

1 Claim, 2 Drawing Sheets
