(57) **CLAIM**

The ornamental design for a display screen or portion thereof with sequential graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a display screen with sequential graphical user interface showing our new design, at a first point in the sequence; and,

FIG. 2 is a front view of a display screen with sequential graphical user interface showing our new design, at a second point in the sequence.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

The broken line showing of the outermost rectangle represents a display screen that forms no part of the claimed design. The remainder of the broken lines illustrate portions of the graphical user interface that form no part of the claimed design.
