(57) **CLAIM**

The ornamental design for a display screen with a graphical user interface, as shown and described.

**DESCRIPTION**

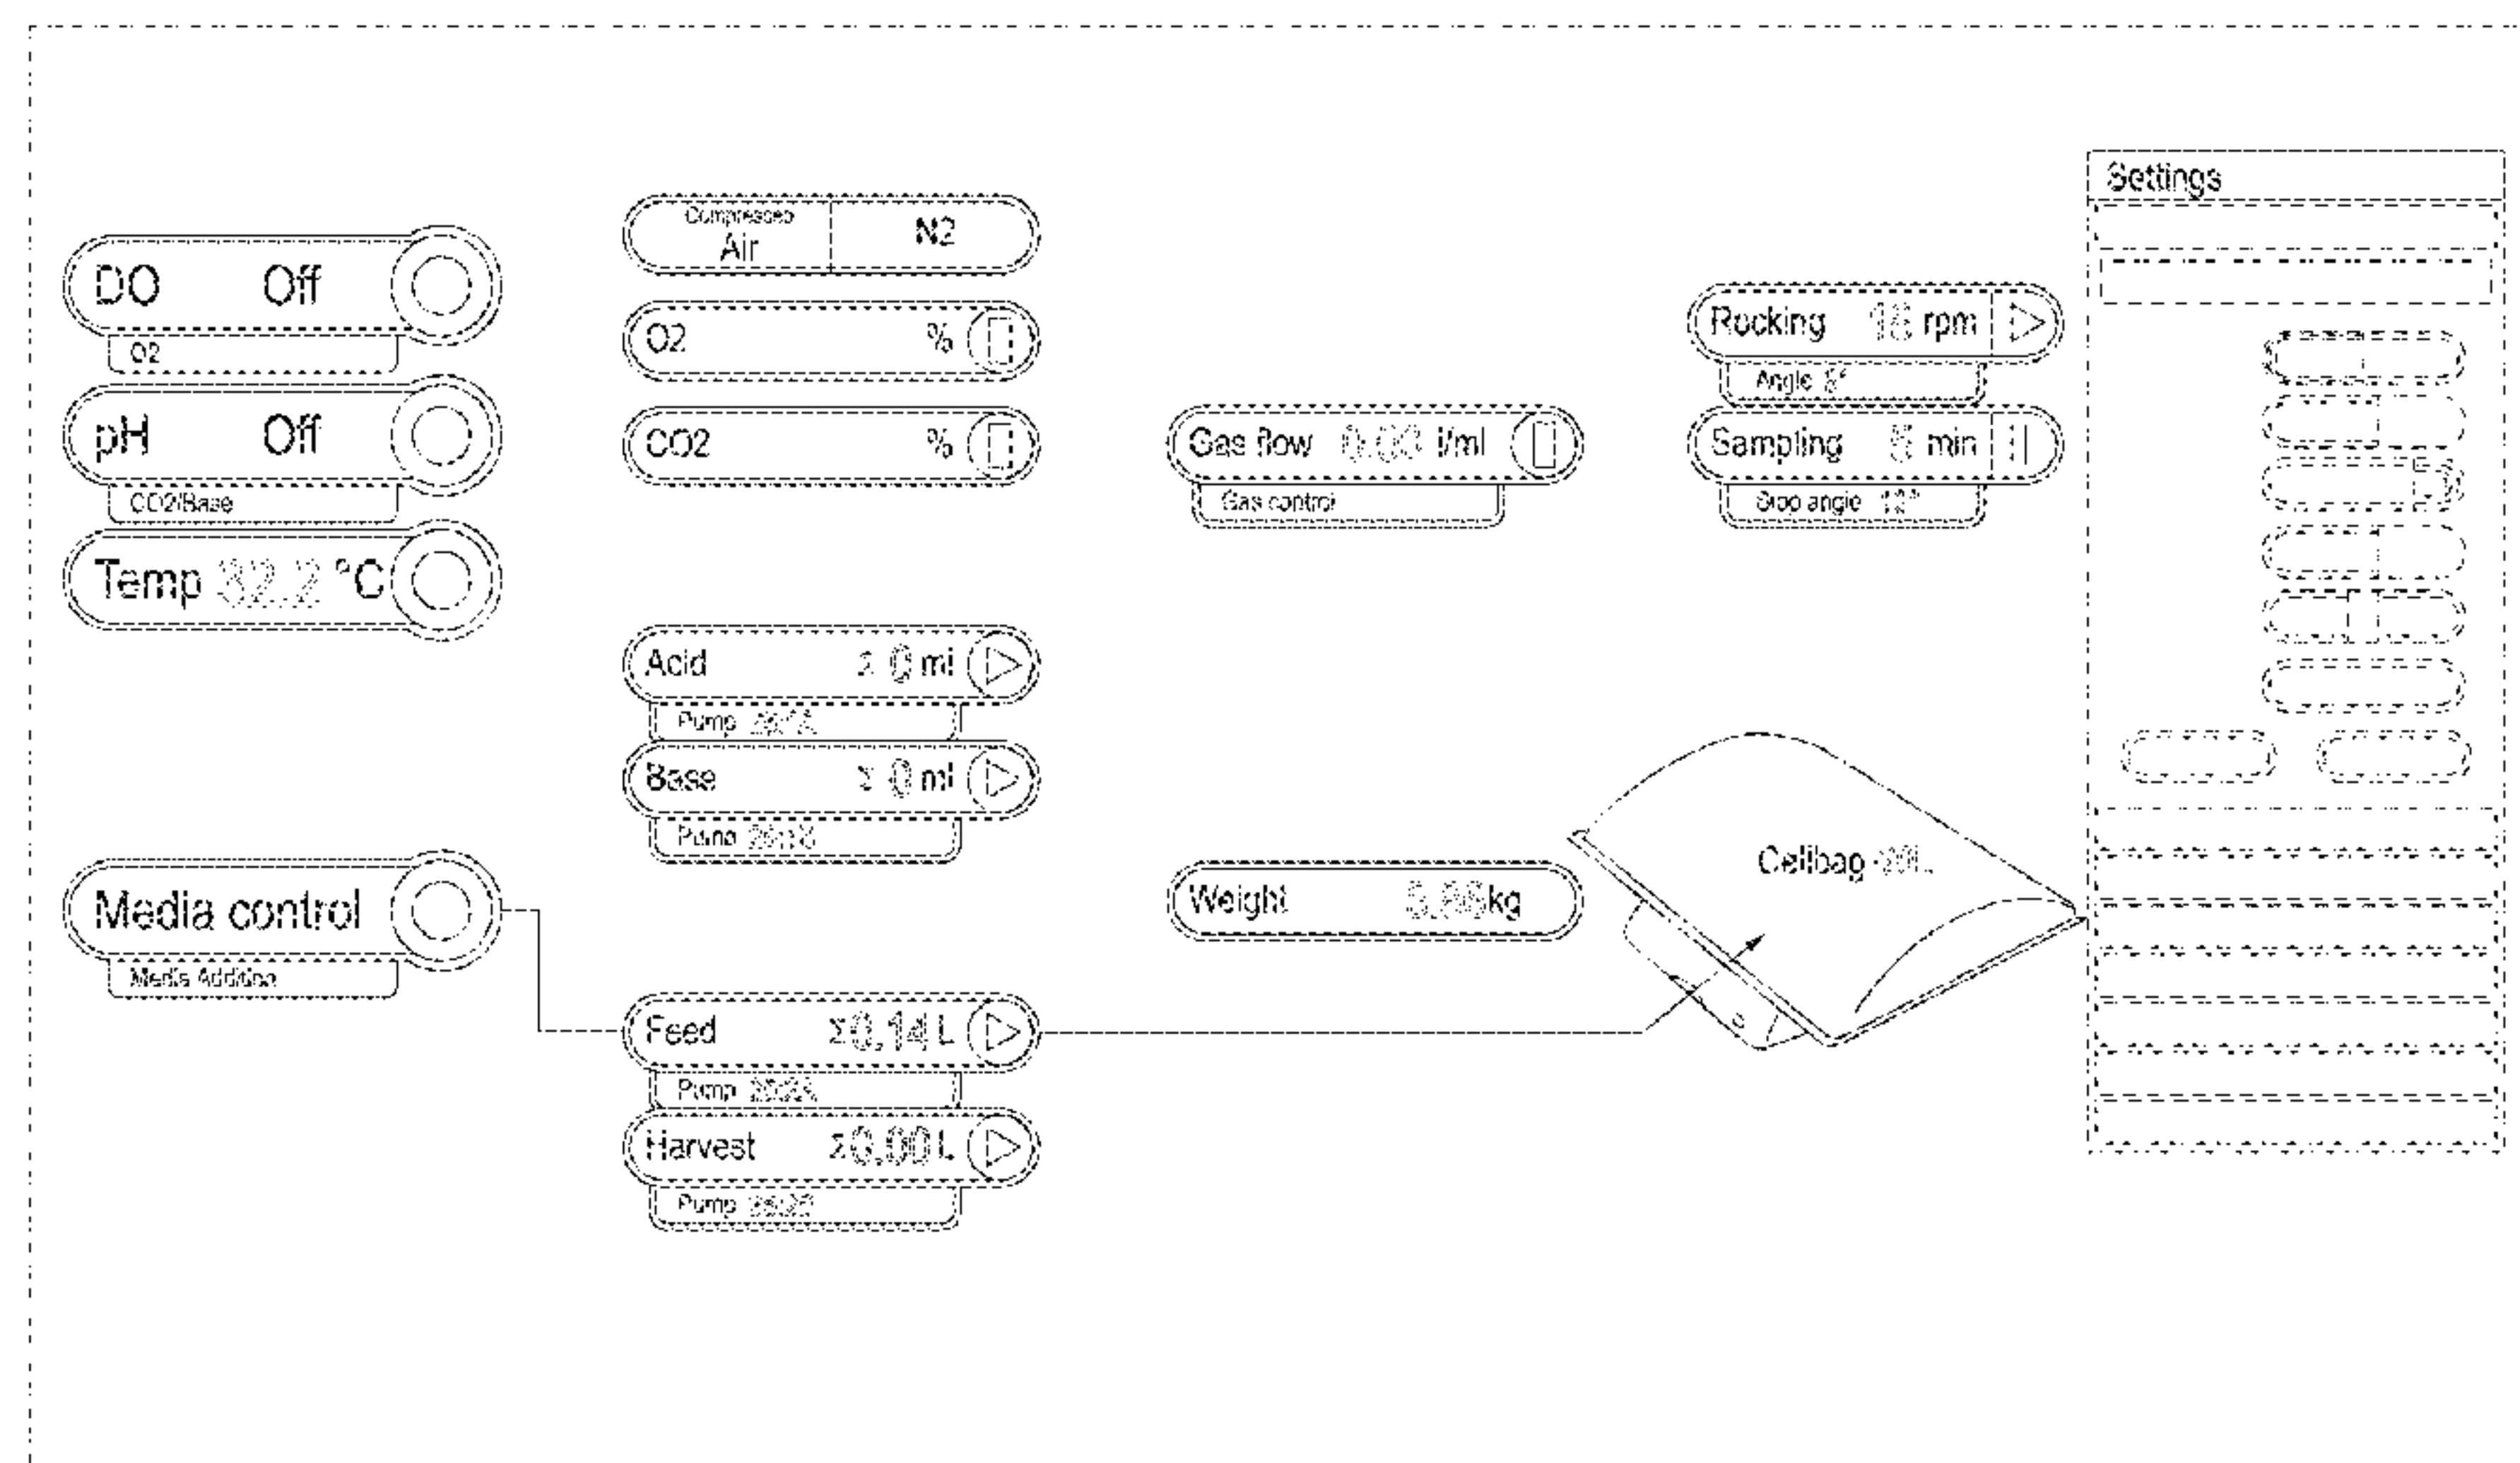

FIG. 1 is a front view of a display screen with a graphical user interface;

FIG. 2 is a front view of a display screen with a graphical user interface showing an alternative embodiment thereof; and,

FIG. 3 is a front view of a display screen with a graphical user interface showing an alternative embodiment thereof. The outermost broken line illustrates a display screen and is a boundary line. The remaining broken lines, including the menu and some of the numbers, illustrate portions of the graphical user interface. None of the broken lines form part of the claimed design.

This design is a view of a screen shown on a computer monitor. The view is generated from a program and displays icons showing parameters for a bioprocess system and method.
