CLAIM

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

The patent file contains at least one drawing executed in color. Copies of the patent file with color drawing(s) will be provided by the Patent Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a display screen with graphical user interface according to our new design, the view showing a first image in a sequence of movement of the graphical user interface;

FIG. 2 is another view thereof showing a second image in the sequence of movement of the graphical user interface;

FIG. 3 is another view thereof showing a third image in the sequence of movement of the graphical user interface;

FIG. 4 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface;

FIG. 5 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface;

FIG. 6 is another view thereof showing a sixth image in the sequence of movement of the graphical user interface;

FIG. 7 is another view thereof showing a seventh image in the sequence of movement of the graphical user interface;

FIG. 8 is a front view of a display screen with graphical user interface according to another embodiment of our new design, the view showing a first image in a sequence of movement of the graphical user interface;

FIG. 9 is another view thereof showing a second image in the sequence of movement of the graphical user interface;

FIG. 10 is another view thereof showing a third image in the sequence of movement of the graphical user interface;

FIG. 11 is another view thereof showing a fourth image in the sequence of movement of the graphical user interface;

FIG. 12 is another view thereof showing a fifth image in the sequence of movement of the graphical user interface;

FIG. 13 is another view thereof showing a sixth image in the sequence of movement of the graphical user interface; and,

FIG. 14 is another view thereof showing a seventh image in the sequence of movement of the graphical user interface.

The dot dash broken line representations of the display screen in the figures form no part of the claimed design.
