(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

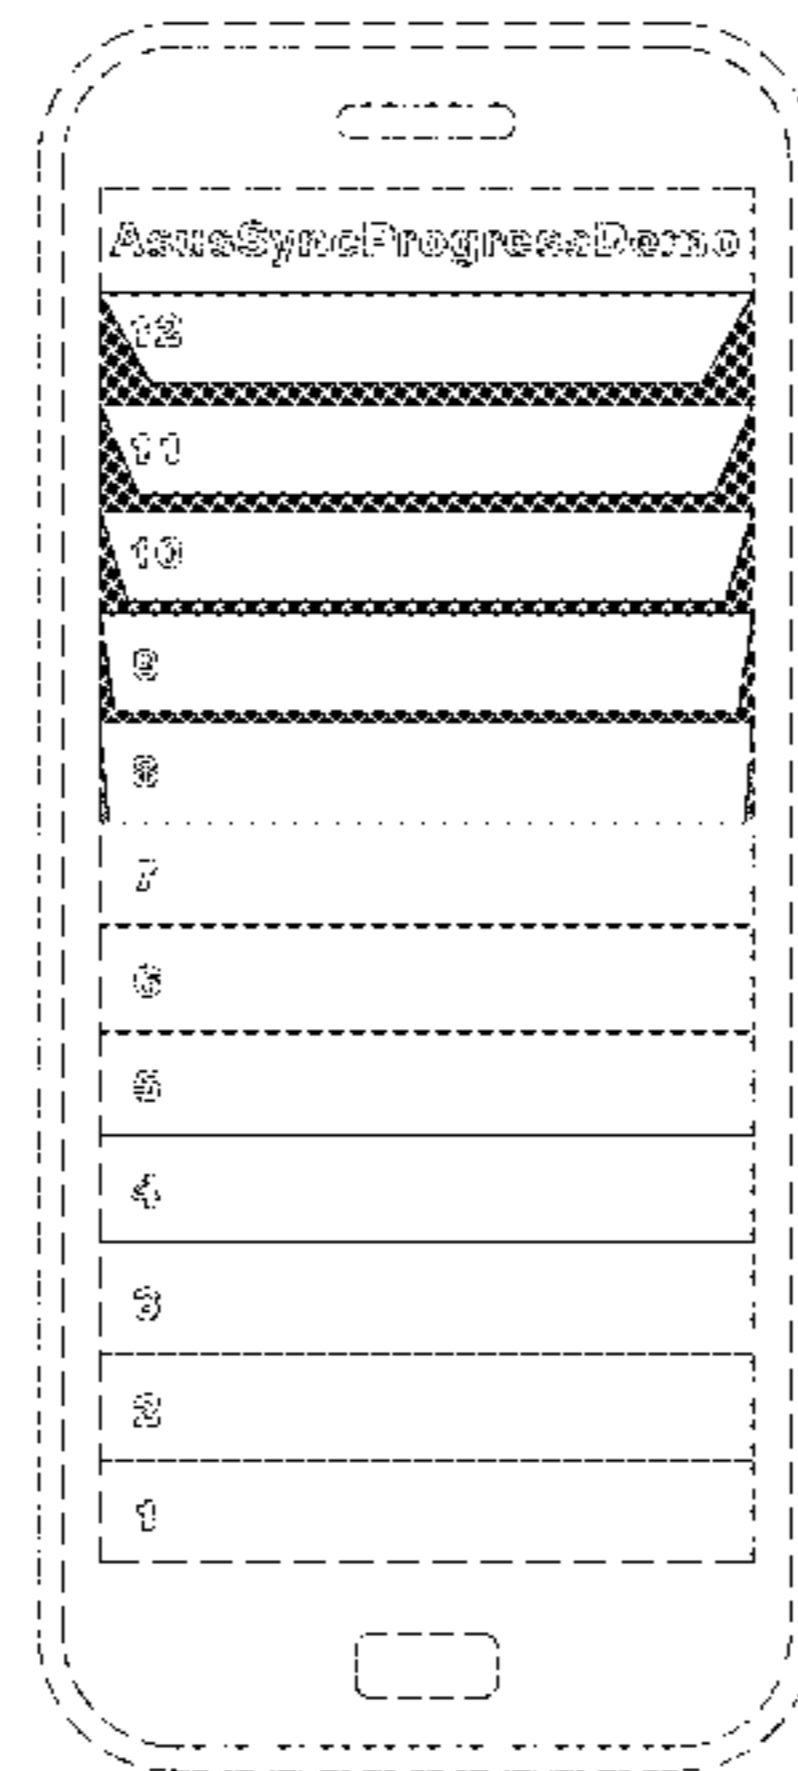

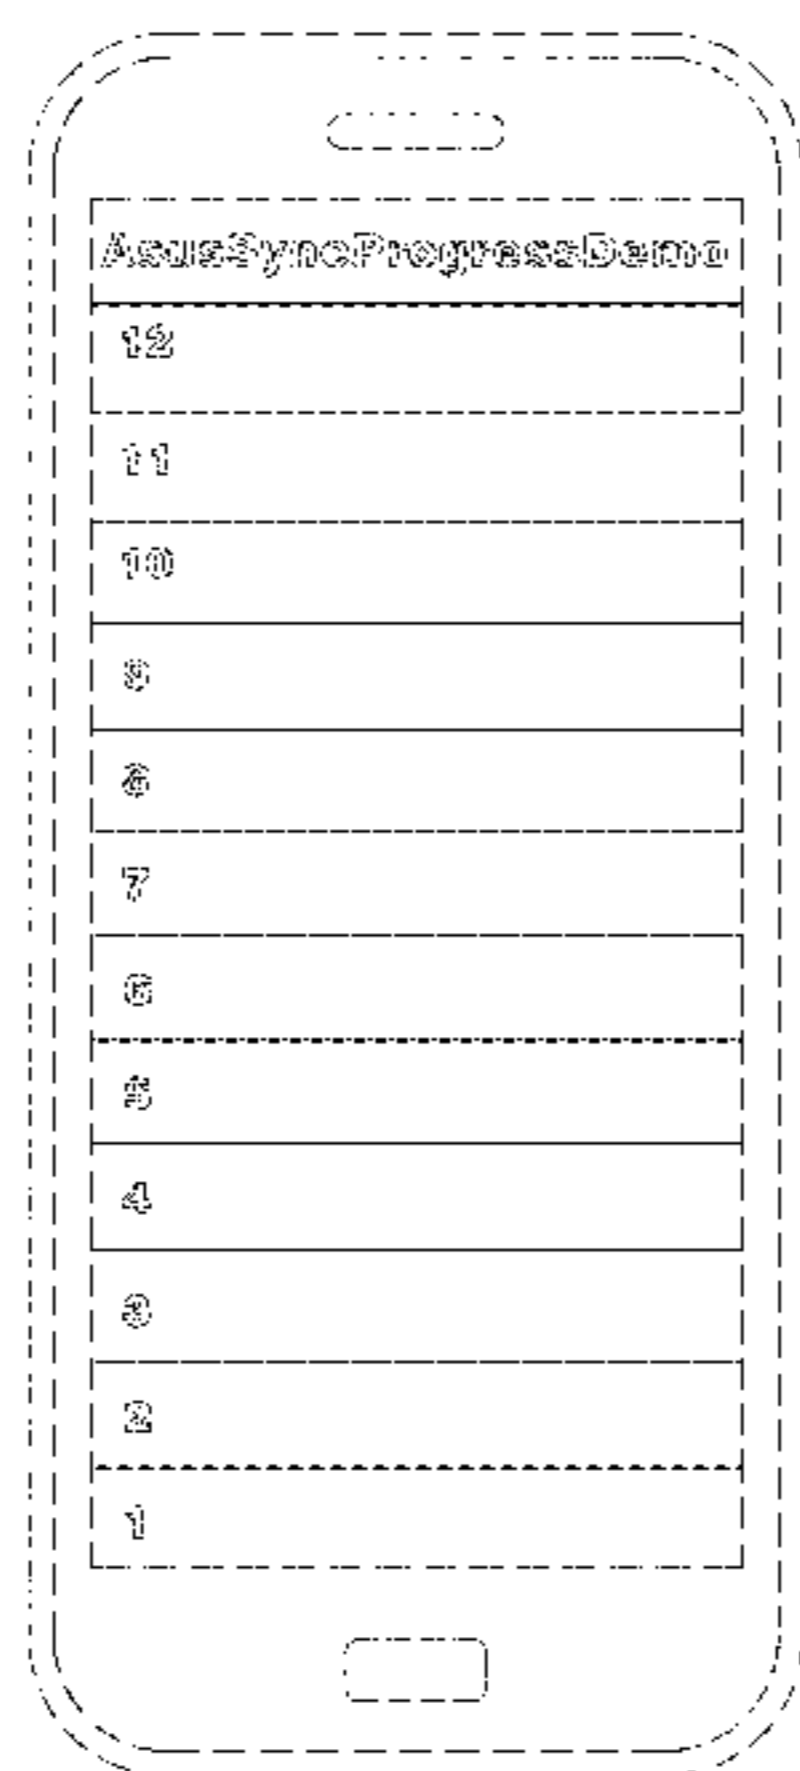

DESCRIPTION

FIG. 1 is a front view of a first image in the sequence for a display screen with graphical user interface showing a first embodiment and a second embodiment of our design; FIG. 2 is a front view of a second image of the first embodiment thereof; and, FIG. 3 is a front view of a second image of the second embodiment thereof.

The outermost set of broken lines and the broken line showing of rounded shapes illustrate an electronic device, the broken line at the periphery of the animated graphical user interface illustrates the display screen, and the broken line showing of text and numbers illustrate portions of the animated graphical user interface. None of the broken lines form part of the claimed design.

The appearance of the transitional image sequentially transitions between the images of the first embodiment shown in FIGS. 1 and 2, and the images of the second embodiment shown in FIGS. 1 and 3. The process of period in which one image transitions to another form no part of the claimed design.
