(57) **CLAIM**

We claim the ornamental design for a reticle for an optical device, as shown and described.

DESCRIPTION

FIG. 1 is a view of a reticle for an optical device, according to a first embodiment.

FIG. 2 is a view of a reticle for an optical device, according to a second embodiment.

FIG. 3 is an enlarged detail view of the reticle of FIG. 2.

FIG. 4 is an enlarged detail view of a reticle for an optical device, according to a third embodiment.

FIG. 5 is an enlarged detail view of a reticle for an optical device, according to a fourth embodiment.

FIG. 6 is an enlarged detail view of a reticle for an optical device, according to a fifth embodiment.

FIG. 7 is an enlarged detail view of a reticle for an optical device, according to a sixth embodiment; and,

FIG. 8 is an isometric view of an environment of use for any of the aforementioned embodiments.

Additional embodiments of the claimed design are: a mirror-reversal of the reticle of FIG. 4 across a vertical axis, a mirror-reversal of the reticle of FIG. 4 across a horizontal axis, a 180 degree rotation of the reticle of FIG. 4, a mirror-reversal of the reticle of FIG. 6 across a vertical axis, a mirror-reversal of the reticle of FIG. 6 across a horizontal axis, and a 180 degree rotation of the reticle of FIG. 6.

The reticle patterns of FIGS. 1-3 are identical except for the vertical offset of the pattern in the embodiment of FIG. 1. In FIGS. 1-8, the dashed lines indicate environmental features that form no part of the claimed invention.

In FIG. 2, the broken lines indicating the area of the detail view of FIG. 3 form no part of the claimed invention.

1 Claim, 7 Drawing Sheets
