(57) **CLAIM**

The ornamental design for a configurable multipurpose tool, as shown and described above.

DESCRIPTION

FIG. 1 is a top plan view of an ornamental design for a configurable multipurpose tool of the present invention in a first configuration;

FIG. 2 is a front view of an ornamental design for a configurable multipurpose tool of the present invention in a first configuration;

FIG. 3 is a right side view of an ornamental design for a configurable multipurpose tool of the present invention in a first configuration;

FIG. 4 is a rear view of an ornamental design for a configurable multipurpose tool of the present invention in a first configuration;

FIG. 5 is a left side view of an ornamental design for a configurable multipurpose tool of the present invention in a first configuration;

FIG. 6 is a bottom plan view of an ornamental design for a configurable multipurpose tool of the present invention in a first configuration;

FIG. 7 is a front end isometric view of an ornamental design for a configurable multipurpose tool of the present invention in a first configuration;

FIG. 8 is a rear end isometric view of an ornamental design for a configurable multipurpose tool of the present invention in a first configuration;

FIG. 9 is a right side isometric view of an ornamental design for a configurable multipurpose tool of the present invention in a second configuration;

FIG. 10 is a left side isometric view of an ornamental design for a configurable multipurpose tool of the present invention in a second configuration;

FIG. 11 is a front end isometric view of an ornamental design for a configurable multipurpose tool of the present invention in a third configuration; and,

FIG. 12 is a rear end isometric view of an ornamental design for a configurable multipurpose tool of the present invention in a third configuration.
