The ornamental design for a display screen or portion thereof with graphical user interface for security to reduce risk, as shown and described.

See application file for complete search history.

DESCRIPTION

(56) **References Cited**

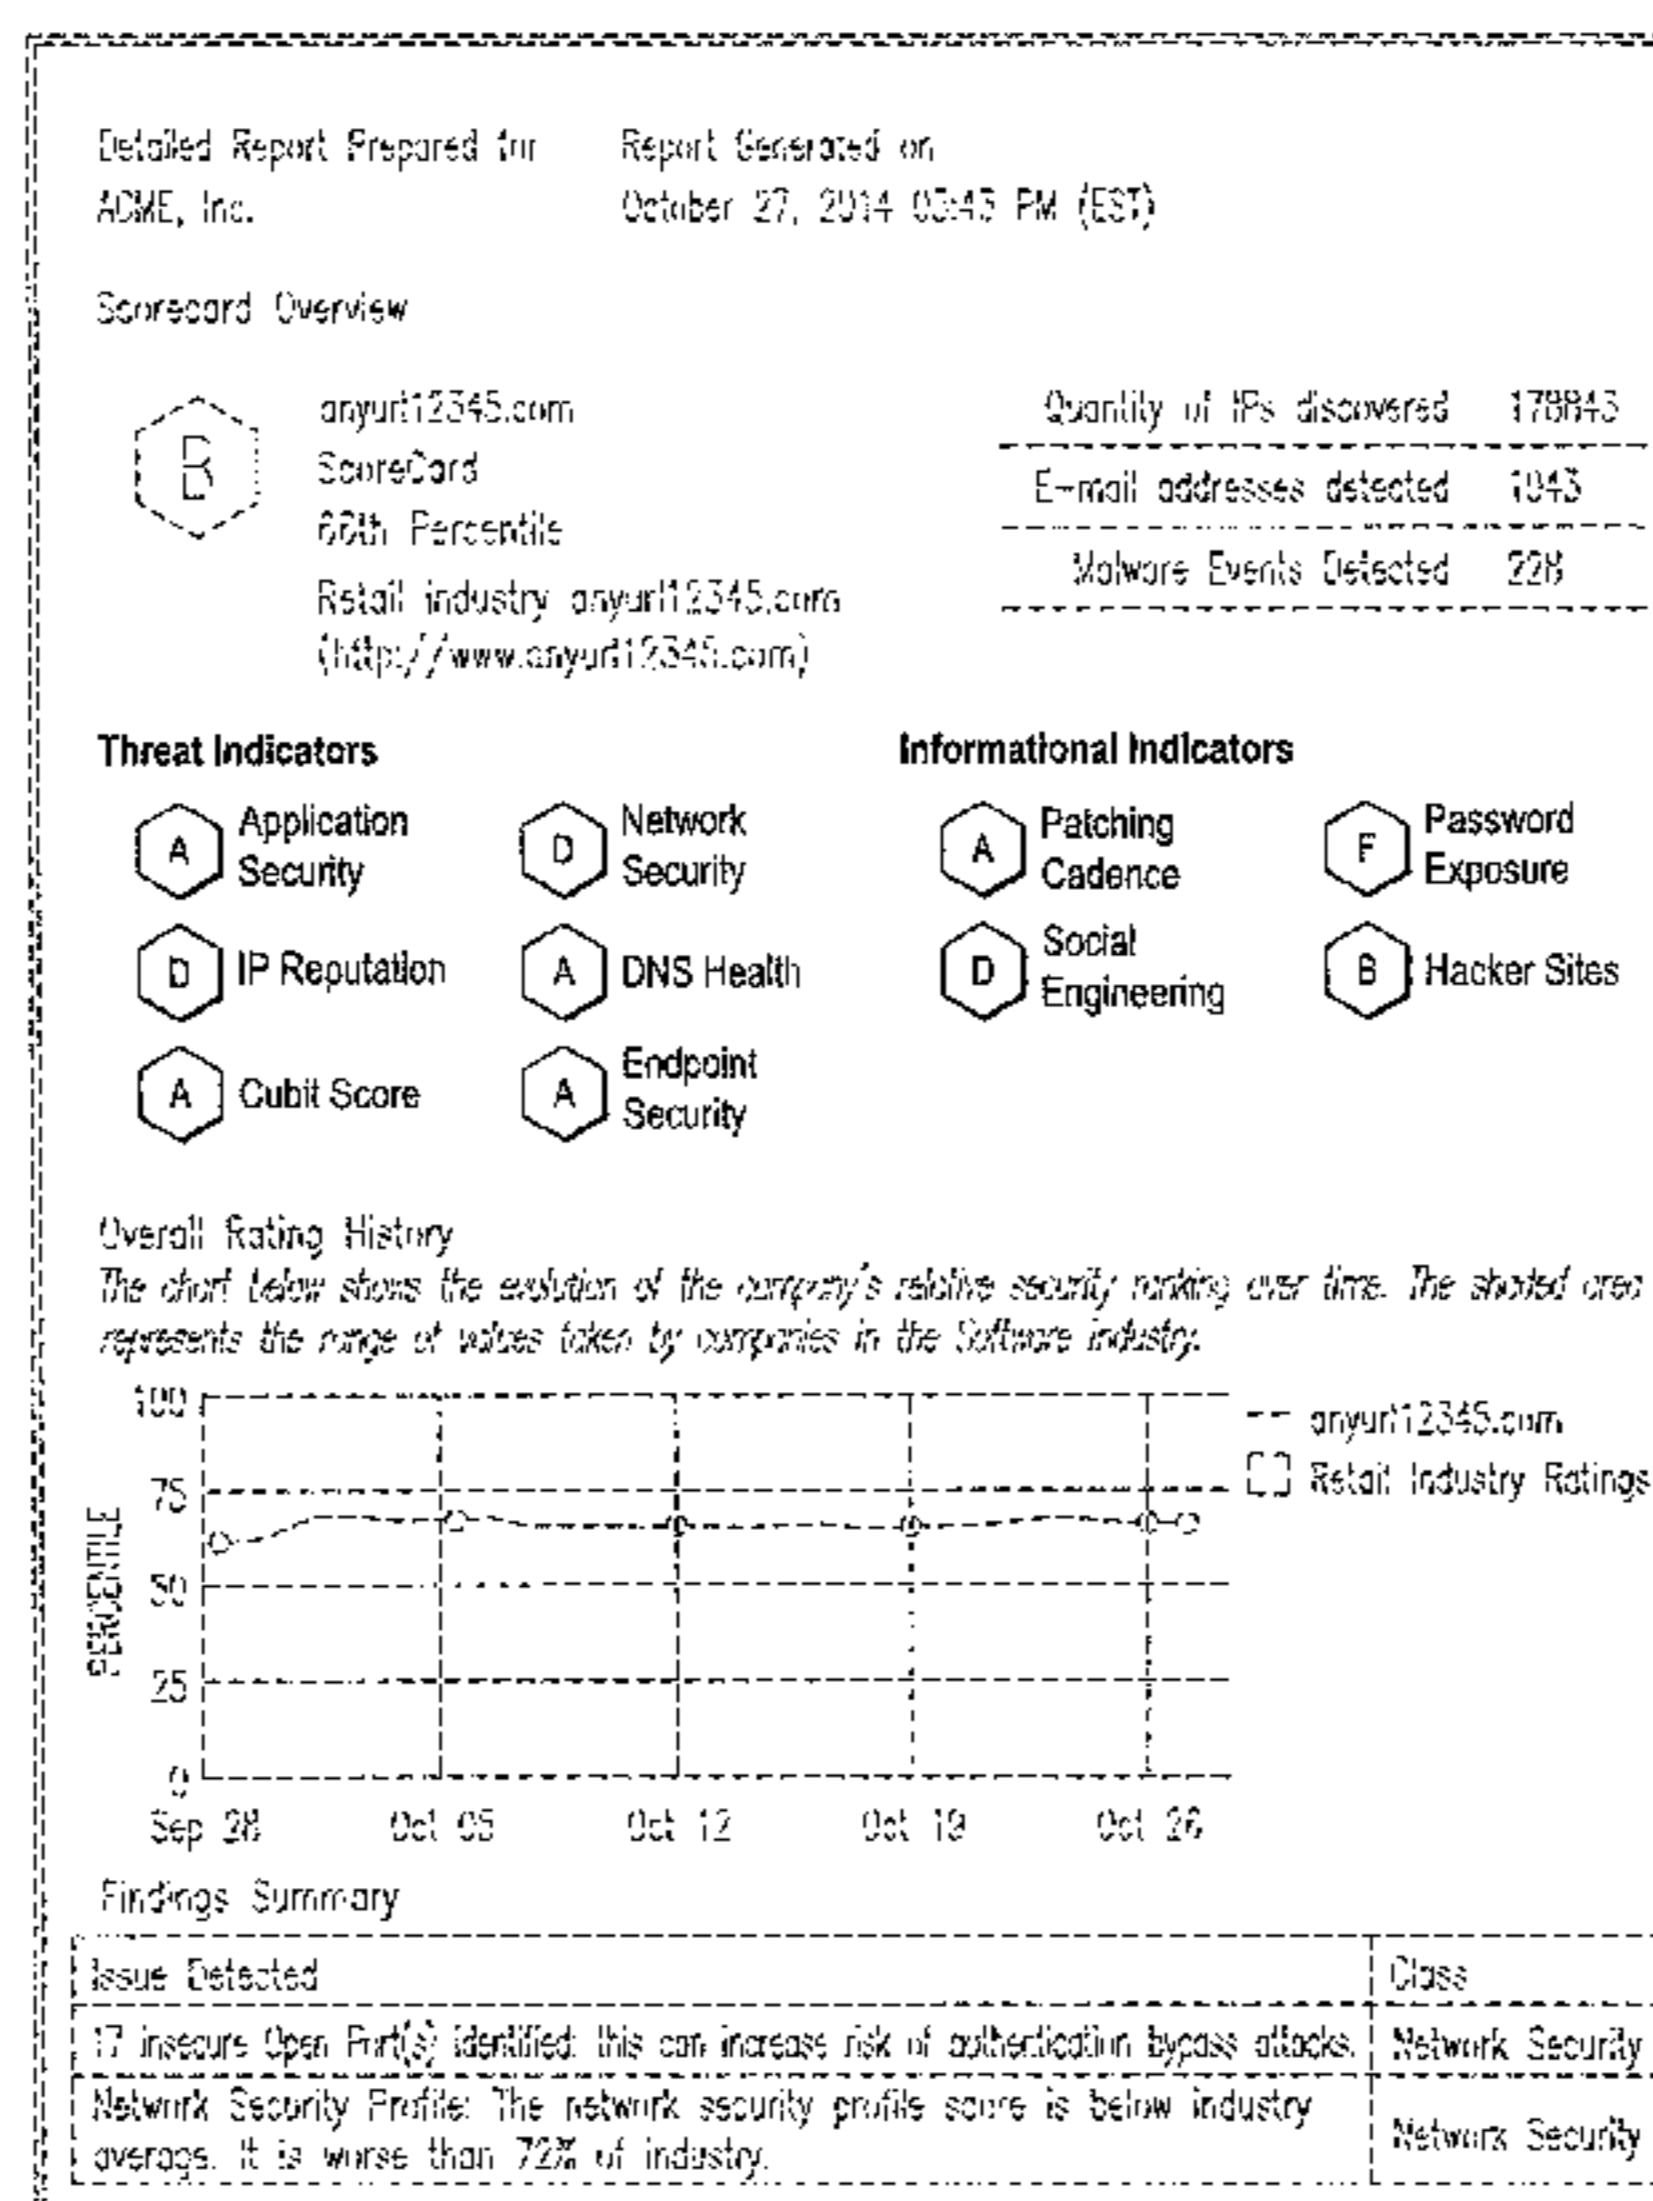

The FIGURE is a front view showing of a display screen or portion thereof with graphical user interface for security to reduce risk.

U.S. PATENT DOCUMENTS

In the FIGURE, the broken lines showing the display screen, electronic device and other features form no part of the claimed design.

ScoreCard
66th Percentile
Retail industry anyurl12345.com
(<http://www.anyurl12345.com>)

Quantity of IPs discovered	178843
E-mail addresses detected	1043
Malware Events Detected	228

Threat Indicators

- A** Application Security
- D** IP Reputation
- A** Cubit Score
- D** Network Security
- A** DNS Health
- A** Endpoint Security

Informational Indicators

- A** Patching Cadence
- D** Social Engineering
- F** Password Exposure
- B** Hacker Sites

Overall Rating History

The chart below shows the evolution of the company's relative security ranking over time. The shaded area represents the range of values taken by companies in the Software industry.

Findings Summary

Issue Detected	Class
17 insecure Open Port(s) identified: this can increase risk of authentication bypass attacks.	Network Security
Network Security Profile: The network security profile score is below industry average. It is worse than 72% of industry.	Network Security
