(57) **CLAIM**

The ornamental design for a mount for an electronic personal training device, as shown and described.

DESCRIPTION

FIG. 1 is an upper perspective view of the mount for an electronic personal training device showing our new ornamental design;

FIG. 2 is a lower perspective view thereof;

FIG. 3 is a right side elevation view, the left side being a mirror image thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a top plan view thereof;

FIG. 6 is a front elevation view thereof; and,

FIG. 7 is a rear elevation view thereof.

The design comprises a mount, preferably to be positioned on a desk or other such flat surface, capable of supporting an electronic personal training device or module thereof; the module comprising a display panel for providing information to a user while performing activities such as running, swimming, cycling or the like, and a 4-way button or other user input device for receiving commands from the user. The module may comprise location determining means, e.g. a global navigation satellite system (GNSS) receiver.
