(57) **CLAIM**

The ornamental design for a hernia mesh, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of the hernia mesh of the present invention;
 FIG. 2 is a front view of the hernia mesh of FIG. 1;
 FIG. 3 is a rear view of the hernia mesh of FIG. 1;
 FIG. 4 is a right side view, in elevation, of the hernia mesh of FIG. 1, taken from the frame of reference of FIG. 2;
 FIG. 5 is a left side view, in elevation, of the hernia mesh of FIG. 1, taken from the frame of reference of FIG. 2;
 FIG. 6 is a top end view, in elevation, of the hernia mesh of FIG. 1, taken from the frame of reference of FIG. 2;
 FIG. 7 is a bottom end view, in elevation, of the hernia mesh of FIG. 1, taken from the frame of reference of FIG. 2;
 FIG. 8 is a perspective view of a second embodiment of the hernia mesh of the present invention;
 FIG. 9 is a front view of the hernia mesh of FIG. 8;
 FIG. 10 is a rear view of the hernia mesh of FIG. 8;

FIG. 11 is a right side view, in elevation, of the hernia mesh of FIG. 8, taken from the frame of reference of FIG. 9;
FIG. 12 is a left side view, in elevation, of the hernia mesh of FIG. 8, taken from the frame of reference of FIG. 9;
FIG. 13 is a top end view, in elevation, of the hernia mesh of FIG. 8, taken from the frame of reference of FIG. 9;
FIG. 14 is a bottom end view, in elevation, of the hernia mesh of FIG. 8, taken from the frame of reference of FIG. 9;
FIG. 15 is a perspective view of a third embodiment of the hernia mesh of the present invention;
FIG. 16 is a front view of the hernia mesh of FIG. 15;
FIG. 17 is a rear view of the hernia mesh of FIG. 15;
FIG. 18 is a right side view, in elevation, of a the hernia mesh of FIG. 15, taken from the frame of reference of FIG. 16;
FIG. 19 is a left side view, in elevation, of the hernia mesh of FIG. 15, taken from the frame of reference of FIG. 16;
FIG. 20 is a top end view, in elevation, of the hernia mesh of FIG. 15, taken from the frame of reference of FIG. 16;

FIG. 21 is a bottom end view, in elevation, of the hernia mesh of FIG. 15, taken from the frame of reference of FIG. 16;
FIG. 22 is a perspective view of a fourth embodiment of the hernia mesh of the present invention;
FIG. 23 is a front view of the hernia mesh of FIG. 22;
FIG. 24 is a rear view of the hernia mesh of FIG. 22;
FIG. 25 is a right side view, in elevation, of the hernia mesh of FIG. 22, taken from the frame of reference of FIG. 23;
FIG. 26 is a left side view, in elevation, of the hernia mesh of FIG. 22, taken from the frame of reference of FIG. 23;
FIG. 27 is a top end view, in elevation, of the hernia mesh of FIG. 22, taken from the frame of reference of FIG. 23;
and,
FIG. 28 is a bottom end view, in elevation, of the hernia mesh of FIG. 22, taken from the frame of reference of FIG. 23.
The broken lines are included for the purpose of illustrating unclaimed portions of the hernia mesh and form no part of the claimed design.
