(57) **CLAIM**

The ornamental design for a dual layer panel, as shown and described.

DESCRIPTION

FIG. **1** is a top front perspective view of a first embodiment of a dual layer panel;
FIG. **2** is a top view thereof, the bottom view being identical to the top view;
FIG. **3** is a front view thereof;
FIG. **4** is a top front perspective view of a second embodiment of a dual layer panel having an appearance the same as the embodiment of FIGS. **1-3** except that top and bottom sheets of the panel have a stippling representing a first color and two dimpled layers forming the dimple core of the panel have a different stippling representing a second color different than the first color;
FIG. **5** is a front view of the panel of FIG. **4**;
FIG. **6** is a top front perspective view of a third embodiment of a dual layer panel having an appearance the same as the embodiment of FIGS. **1-3** except that a top sheet of the panel and a lower dimpled layer of the dimple core having a stippling representing a first color and a bottom sheet of the panel and an upper dimpled layer of the dimple core having a different stippling representing a second color different than the first color;
FIG. **7** is a front view of the panel of FIG. **6**;
FIG. **8** is a top front perspective view of a fourth embodiment of a dual layer panel having an appearance the same as the embodiment of FIGS. **1-3** except that a top sheet of the panel and an upper dimpled layer of the dimple core have a stippling representing a first color and a bottom sheet of the panel and a lower dimpled layer of the dimple core have a different stippling representing a second color different than the first color;
FIG. **9** is a front view of the panel of FIG. **8**;
FIG. **10** is a top front perspective view of a fifth embodiment of a dual layer panel having an appearance the same as the embodiment of FIGS. **1-3** except that a top sheet of the panel has a stippling representing a first color and a bottom sheet of the panel and dimpled layers of the dimple core have a different stippling representing a second color different than the first color;
FIG. **11** is a front view of the panel of FIG. **10**;
FIG. **12** is a top front perspective view of a sixth embodiment of a dual layer panel having an appearance the same as the embodiment of FIGS. **1-3** except that a top sheet of the panel has a stippling representing a first color, an upper dimpled layer of the dimple core has a stippling representing a second color, a lower dimpled layer of the dimple core has a stippling representing a third color, and a bottom sheet of the panel has a stippling representing a fourth color, at least one of the first, second, third and fourth colors being different from the others; and,
FIG. **13** is a front view of the panel of FIG. **12**.

The rear views of each embodiment form no part of the claimed design.

The broken lines define the boundaries of the claimed design and form no part thereof.
