DESCRIPTION
FIG. 1 shows a first image of the television screen with a transitional graphical user interface in which an app is being selected; and,
FIG. 2 shows the first image in which the app is being moved to a different location.
The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2. The process or period in which one image transitions to another image forms no part of the claimed design.
The outer edge of the portion of the display screen is understood to be congruent with the outer edge of the graphical user interface.
The portions of the graphical user interface shown in broken lines form no part of the claimed design.
