(57) **CLAIM**

The ornamental design for an operation device for a vehicle equipment, as shown and described.

DESCRIPTION

FIG. 1 is a front elevation view of an operation device for an operation device for a vehicle equipment showing our new design;

FIG. 2 is a rear elevation view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a left side elevation view thereof;

FIG. 6 is a right side elevation view thereof;

FIG. 7 is a front, bottom, and right side perspective view thereof; and,

FIG. 8 is a front, top, and left side perspective view thereof, wherein the operation device is shown in use and attached to a vehicle.

The broken lines showing features of the operation device for a vehicle equipment are provided for the purposes of illustrating portions of the article that form no part of the claimed design. Furthermore, in FIG. 8, the broken line showing the vehicle console and portions of a vehicle are provided to illustrate environmental structure and also forms not part of the claimed design.

The article of the present design relates to an operation device for a vehicle equipment. For example, the operation device may be attached to a position of a vehicle, and may be used for remotely operating a vehicle equipment such as a navigation device, an air conditioner, various audio devices or the like, as shown in the reference view.
