(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first embodiment of a display screen with graphical user interface showing our new design; and,

FIG. 2 is a front view of a second embodiment of a display screen with graphical user interface showing our new design.

The broken line showings of the display screen and of portions of the graphical user interface illustrate portions of the display screen with graphical user interface that form no part of the claimed design. FIG. 2 includes grayscale shading. The darker grayscale shading represents a shade that is different and/or darker than unshaded portions of the claimed design and lighter grayscale shaded portions of the claimed design. The lighter grayscale shading represents a shade that is different and/or darker than unshaded portions of the claimed design and a shade that is different and/or lighter than the darker grayscale shaded portions of the claimed design.
