(57) **CLAIM**

The ornamental design for a knee device for assisting babies with crawling, as shown and described.

DESCRIPTION

FIG. 1 is a top view of my new design for a knee device for assisting babies with crawling;
 FIG. 2 is a front view thereof;
 FIG. 3 bottom view thereof;
 FIG. 4 is a back view thereof;
 FIG. 5 is an alternate left view thereof showing the knee device for assisting babies with crawling folded;
 FIG. 6 is an alternate right view thereof showing the knee device for assisting babies with crawling folded;
 FIG. 7 is an alternate front perspective view thereof; and,
 FIG. 8 is an alternate rear perspective view thereof.

This knee device for assisting babies with crawling is a useful device that snugs on the knees of babies and protects their knees from rubbing against the floor while crawling. This allows kids to crawl without hurting or scratching their knees while they crawl.
