(57) **CLAIM**

The ornamental design for a display screen with an animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first embodiment of a display screen with an animated graphical user interface showing a first image;

FIG. 2 is a front view of a second image thereof;

FIG. 3 is a front view of second embodiment of a display screen with an animated graphical user interface showing a first image;

FIG. 4 is a front view of a second image thereof;

FIG. 5 is a front view of a third embodiment of a display screen with an animated graphical user interface showing a first image; and,

FIG. 6 is a front view of a second image thereof.

The broken lines shown in the drawings of a band of a wearable device, a display screen of a wearable device, a silhouette of an image, and an arrow depicting a direction of the transition of the images form no part of the claimed design.

The appearance of the transitional image sequentially transitions between the images shown within the embodiments shown in FIGS. 1-2, FIGS. 3-4, and FIGS. 5-6, respectively. No ornamental aspects are associated with the process or period in which one image transitions to another image.

1 Claim, 6 Drawing Sheets
