(57) **CLAIM**

The ornamental design for a watch dial, as shown and described.

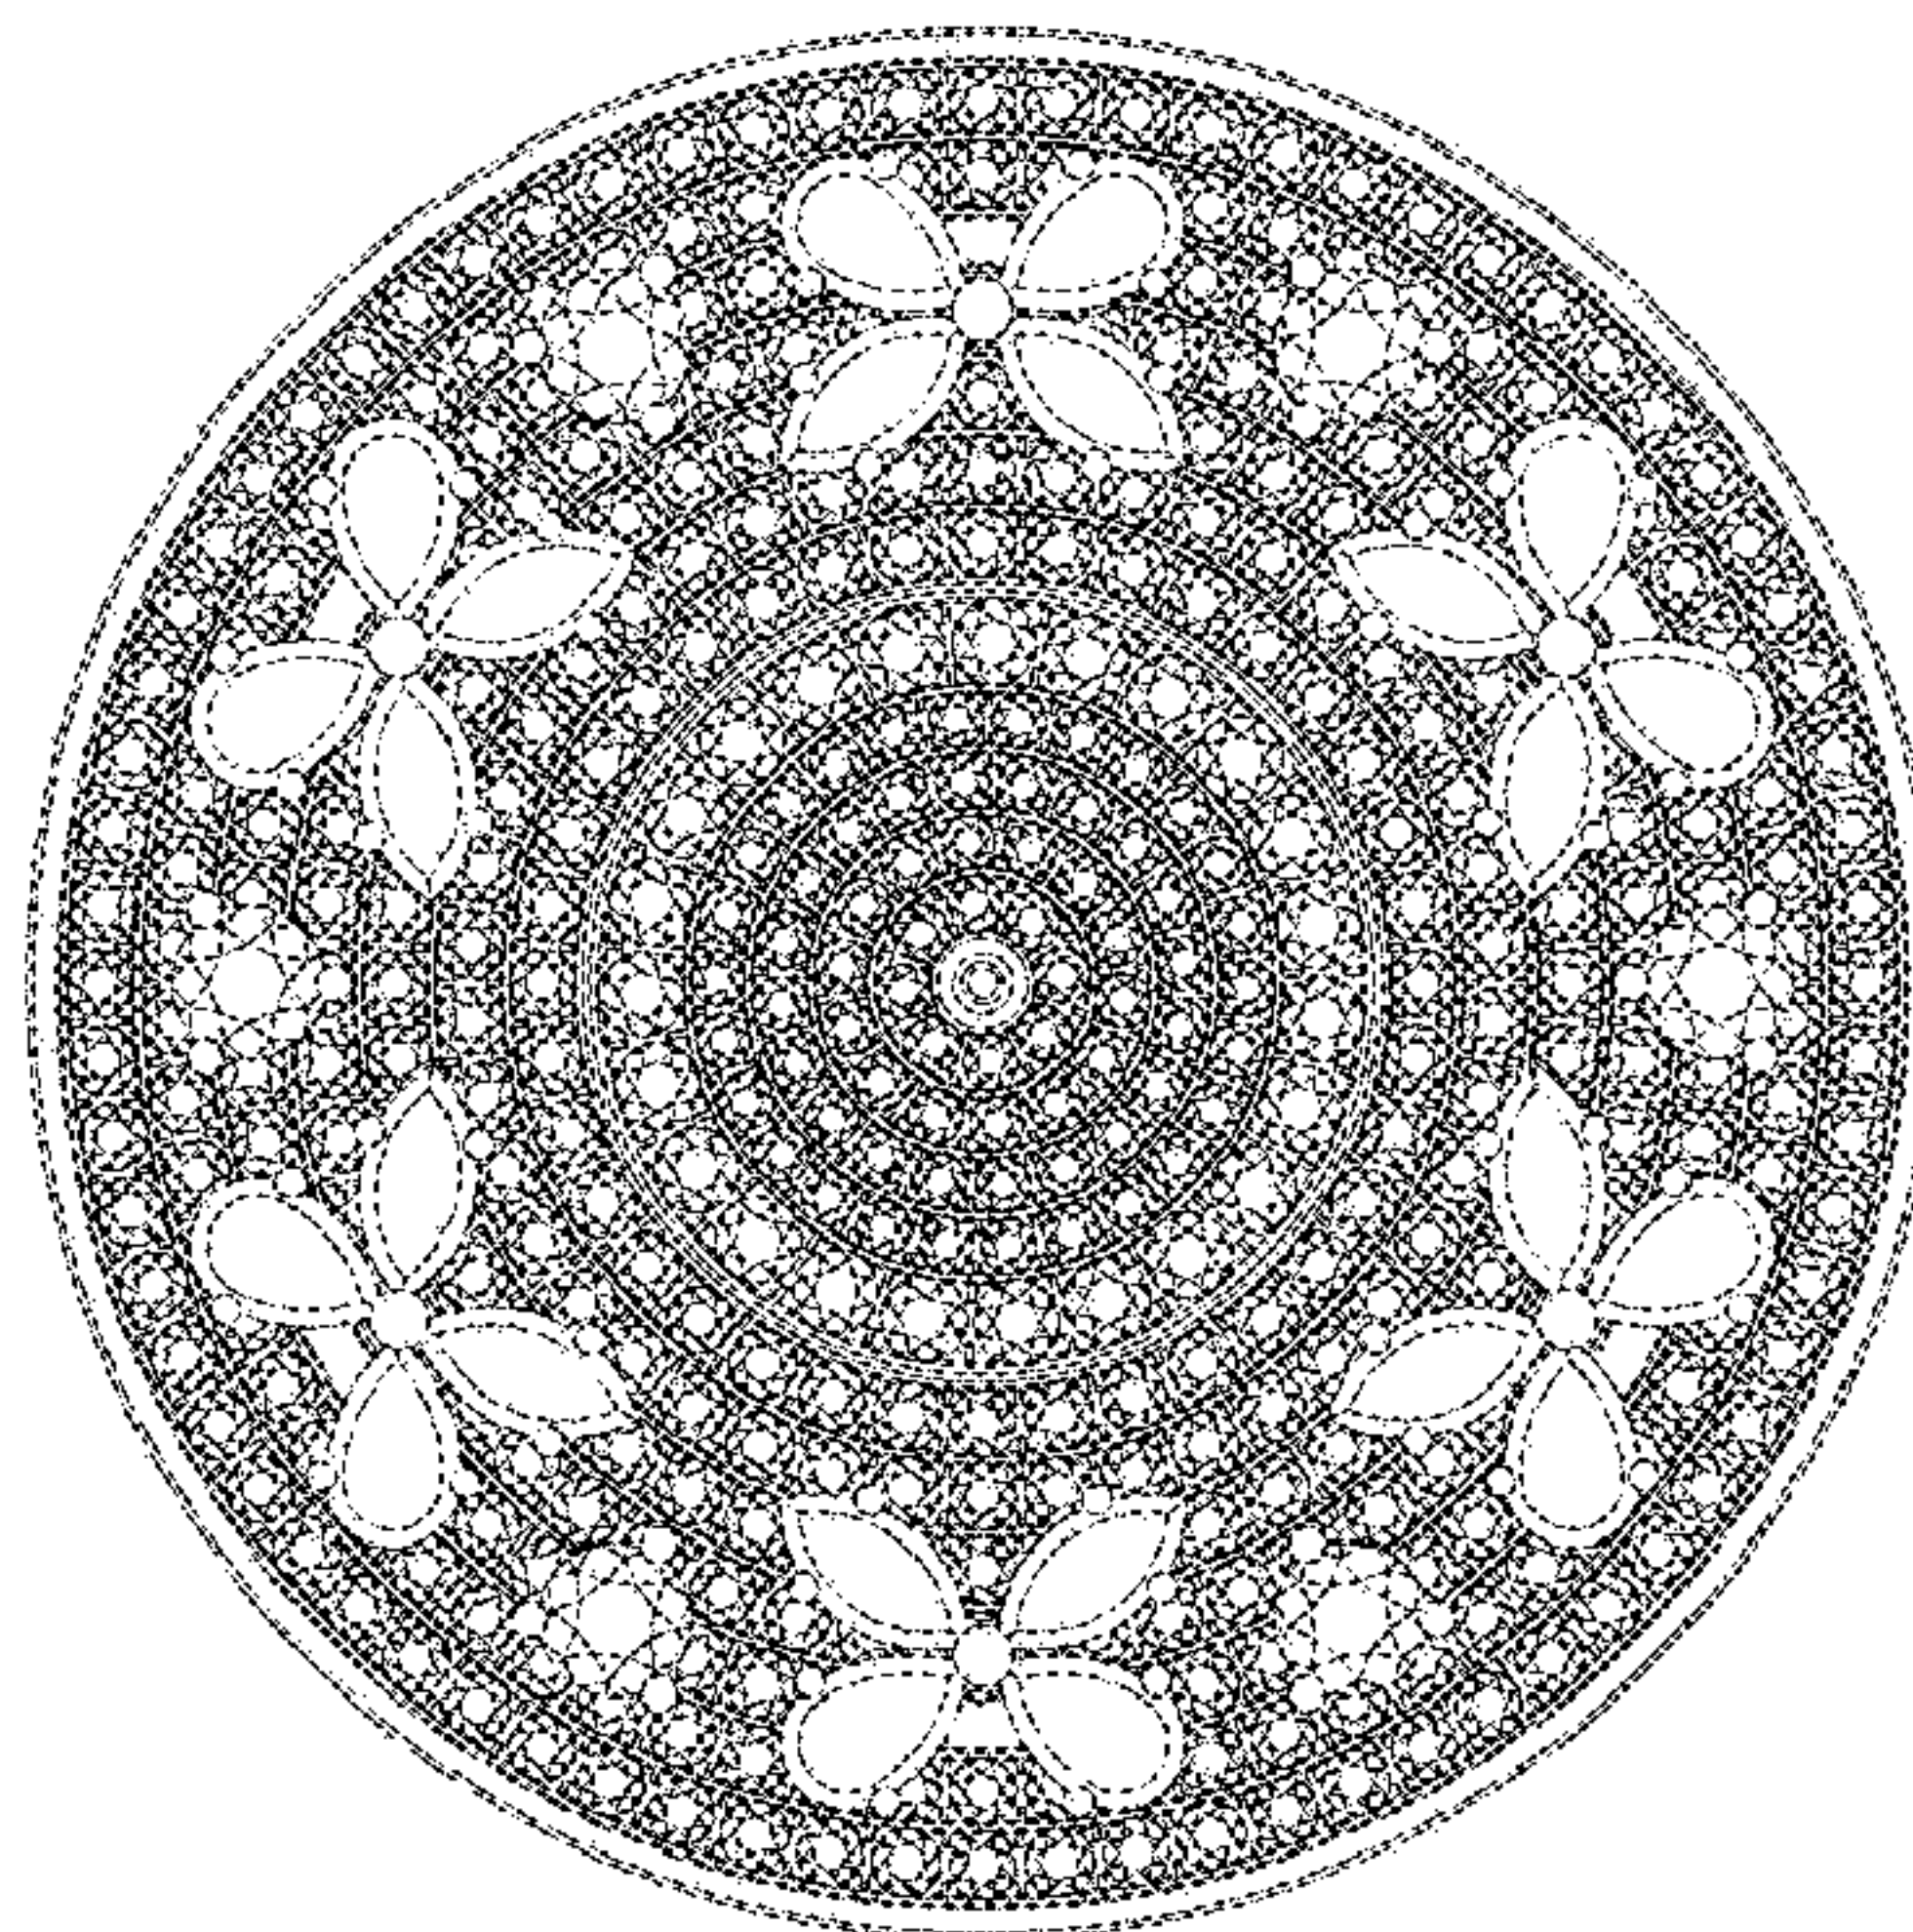

DESCRIPTION

FIG. 1 is a first top plan view in a sequence of an animated watch dial showing my new design; FIG. 2 is a second top plan view in a sequence thereof; FIG. 3 is a third top plan view in a sequence thereof; FIG. 4 is a fourth top plan view in a sequence thereof; FIG. 5 is a fifth top plan view in a sequence thereof; FIG. 6 is a sixth top plan view in a sequence thereof; FIG. 7 is a seventh top plan view in a sequence thereof; FIG. 8 is an eighth top plan view in a sequence thereof; FIG. 9 is a ninth top plan view in a sequence thereof; FIG. 10 is a tenth top plan view in a sequence thereof; FIG. 11 is an eleventh top plan view in a sequence thereof; FIG. 12 is a twelfth top plan view in a sequence thereof; and, FIG. 13 is a top right perspective view of the watch dial as it appears in the first sequence.

The characteristic feature of the design resides in the animated/changing nature of the ornamental appearance of the watch dial. Specifically, the portion of the watch dial containing the butterflies rotates around the portion of the watch dial containing the watch hands, and the butterflies themselves rotate, as the wearer of the watch dial moves his or her wrist.

The appearance of the watch dial sequentially transitions between the views shown in FIGS. 1-12. The process or period in which one view transitions to another view forms no part of the claimed design.

1 Claim, 4 Drawing Sheets
