(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface for navigating event information, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence of a display screen with a transitional graphical user interface for navigating event information;

FIG. 2 is a front view of the second image thereof;

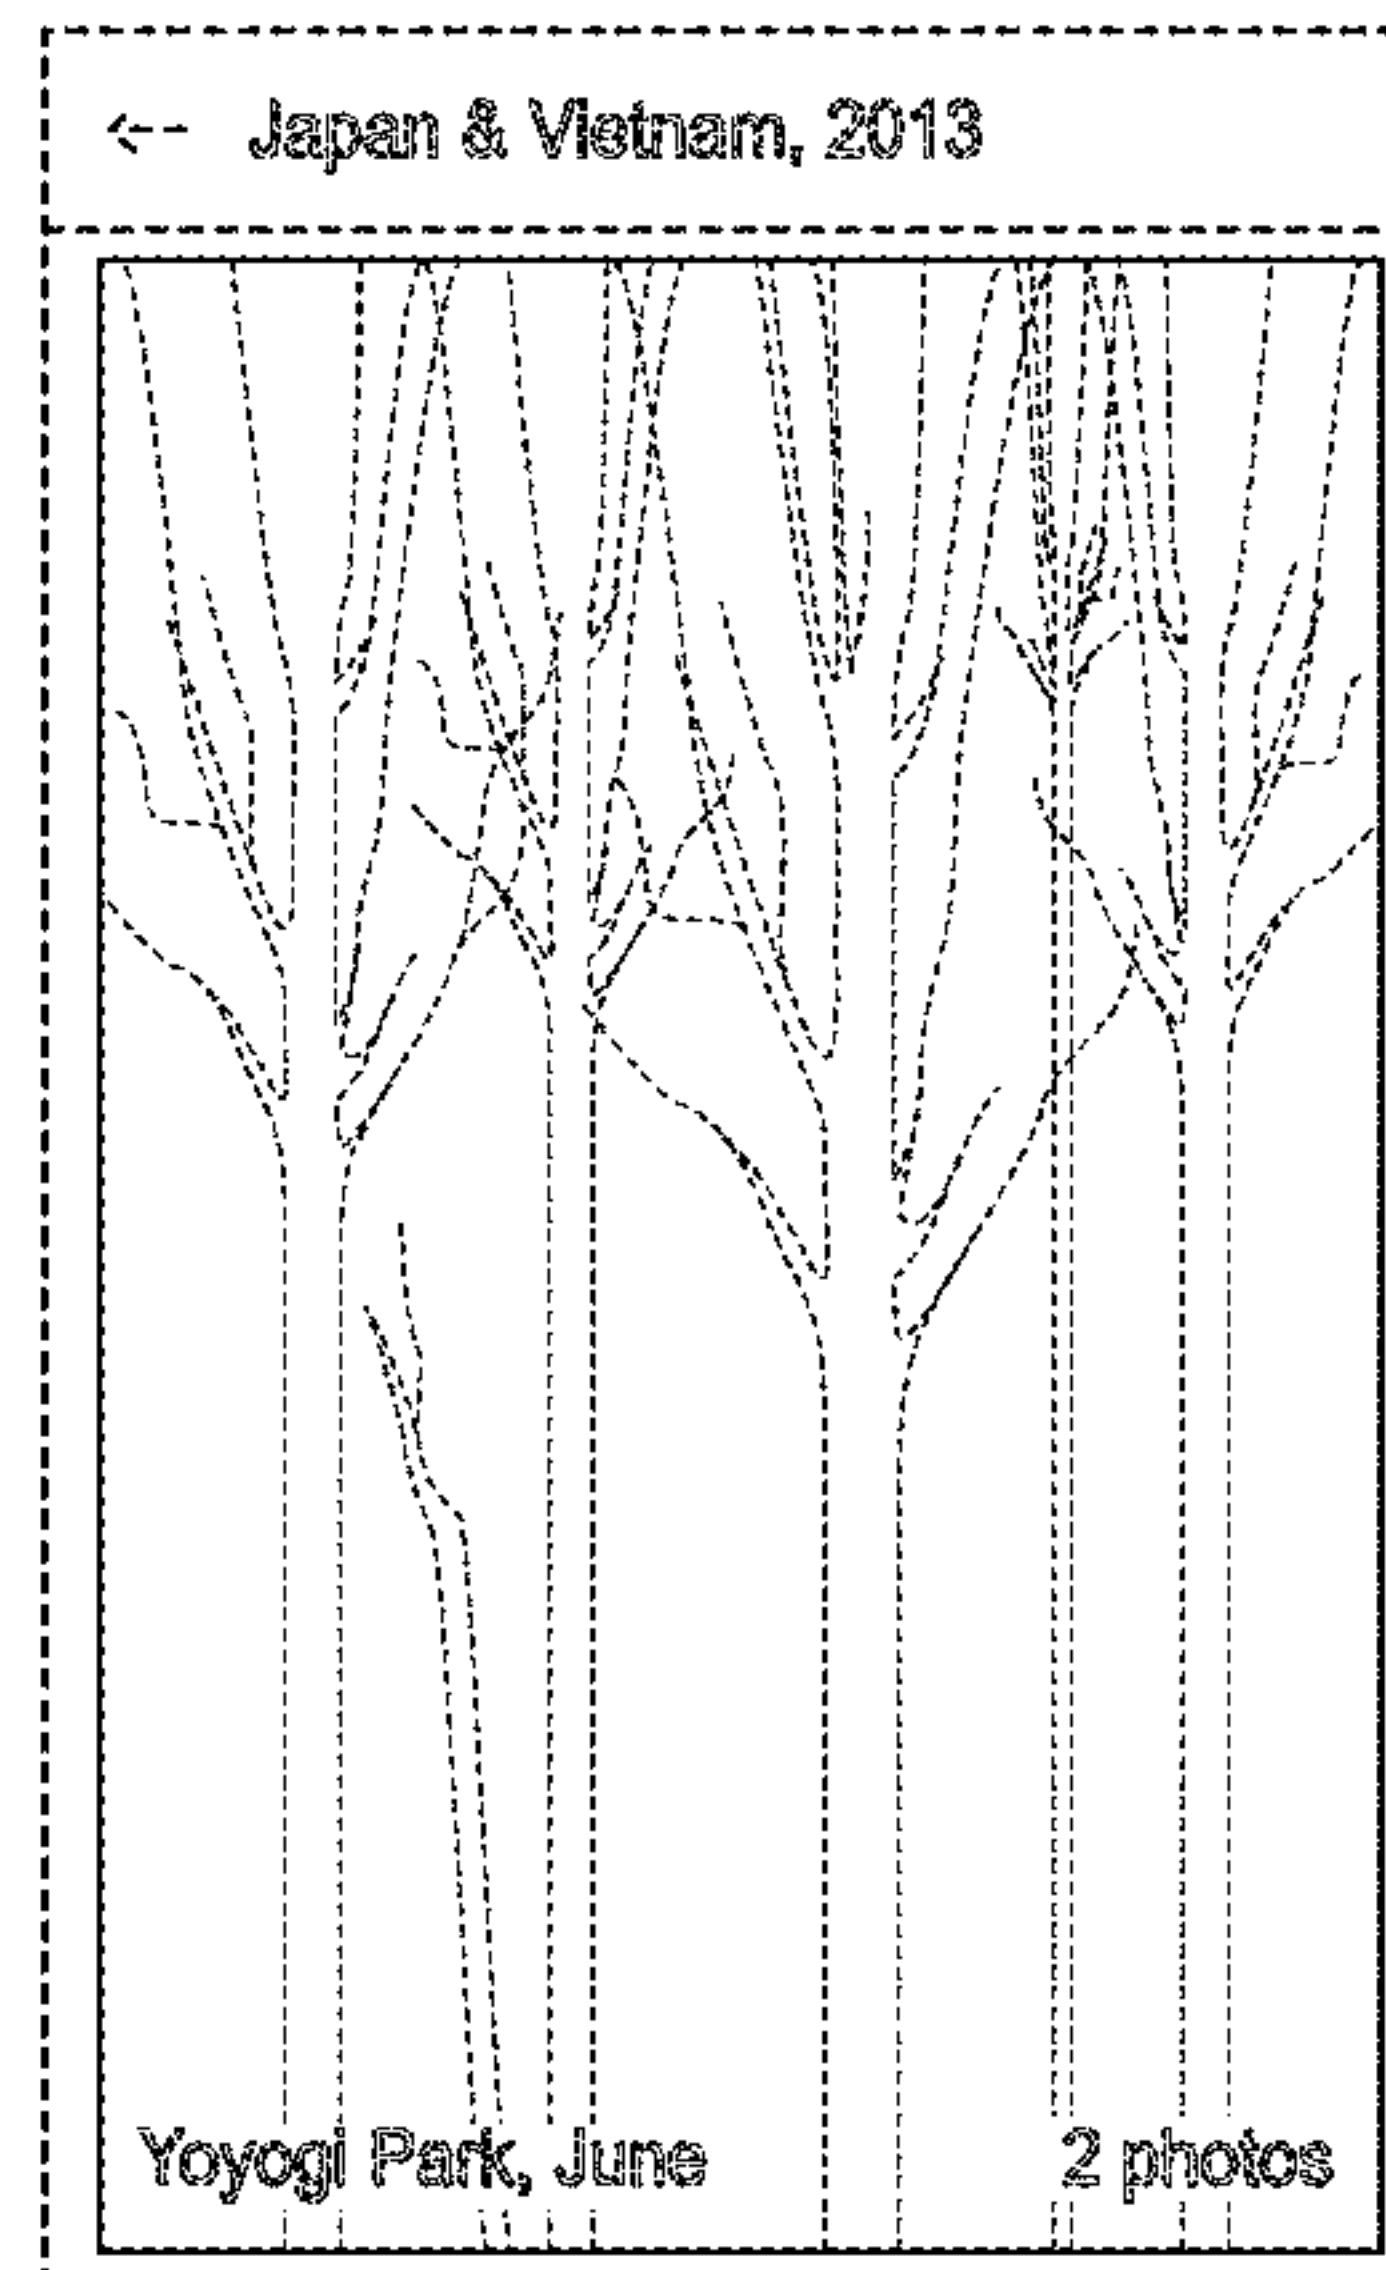

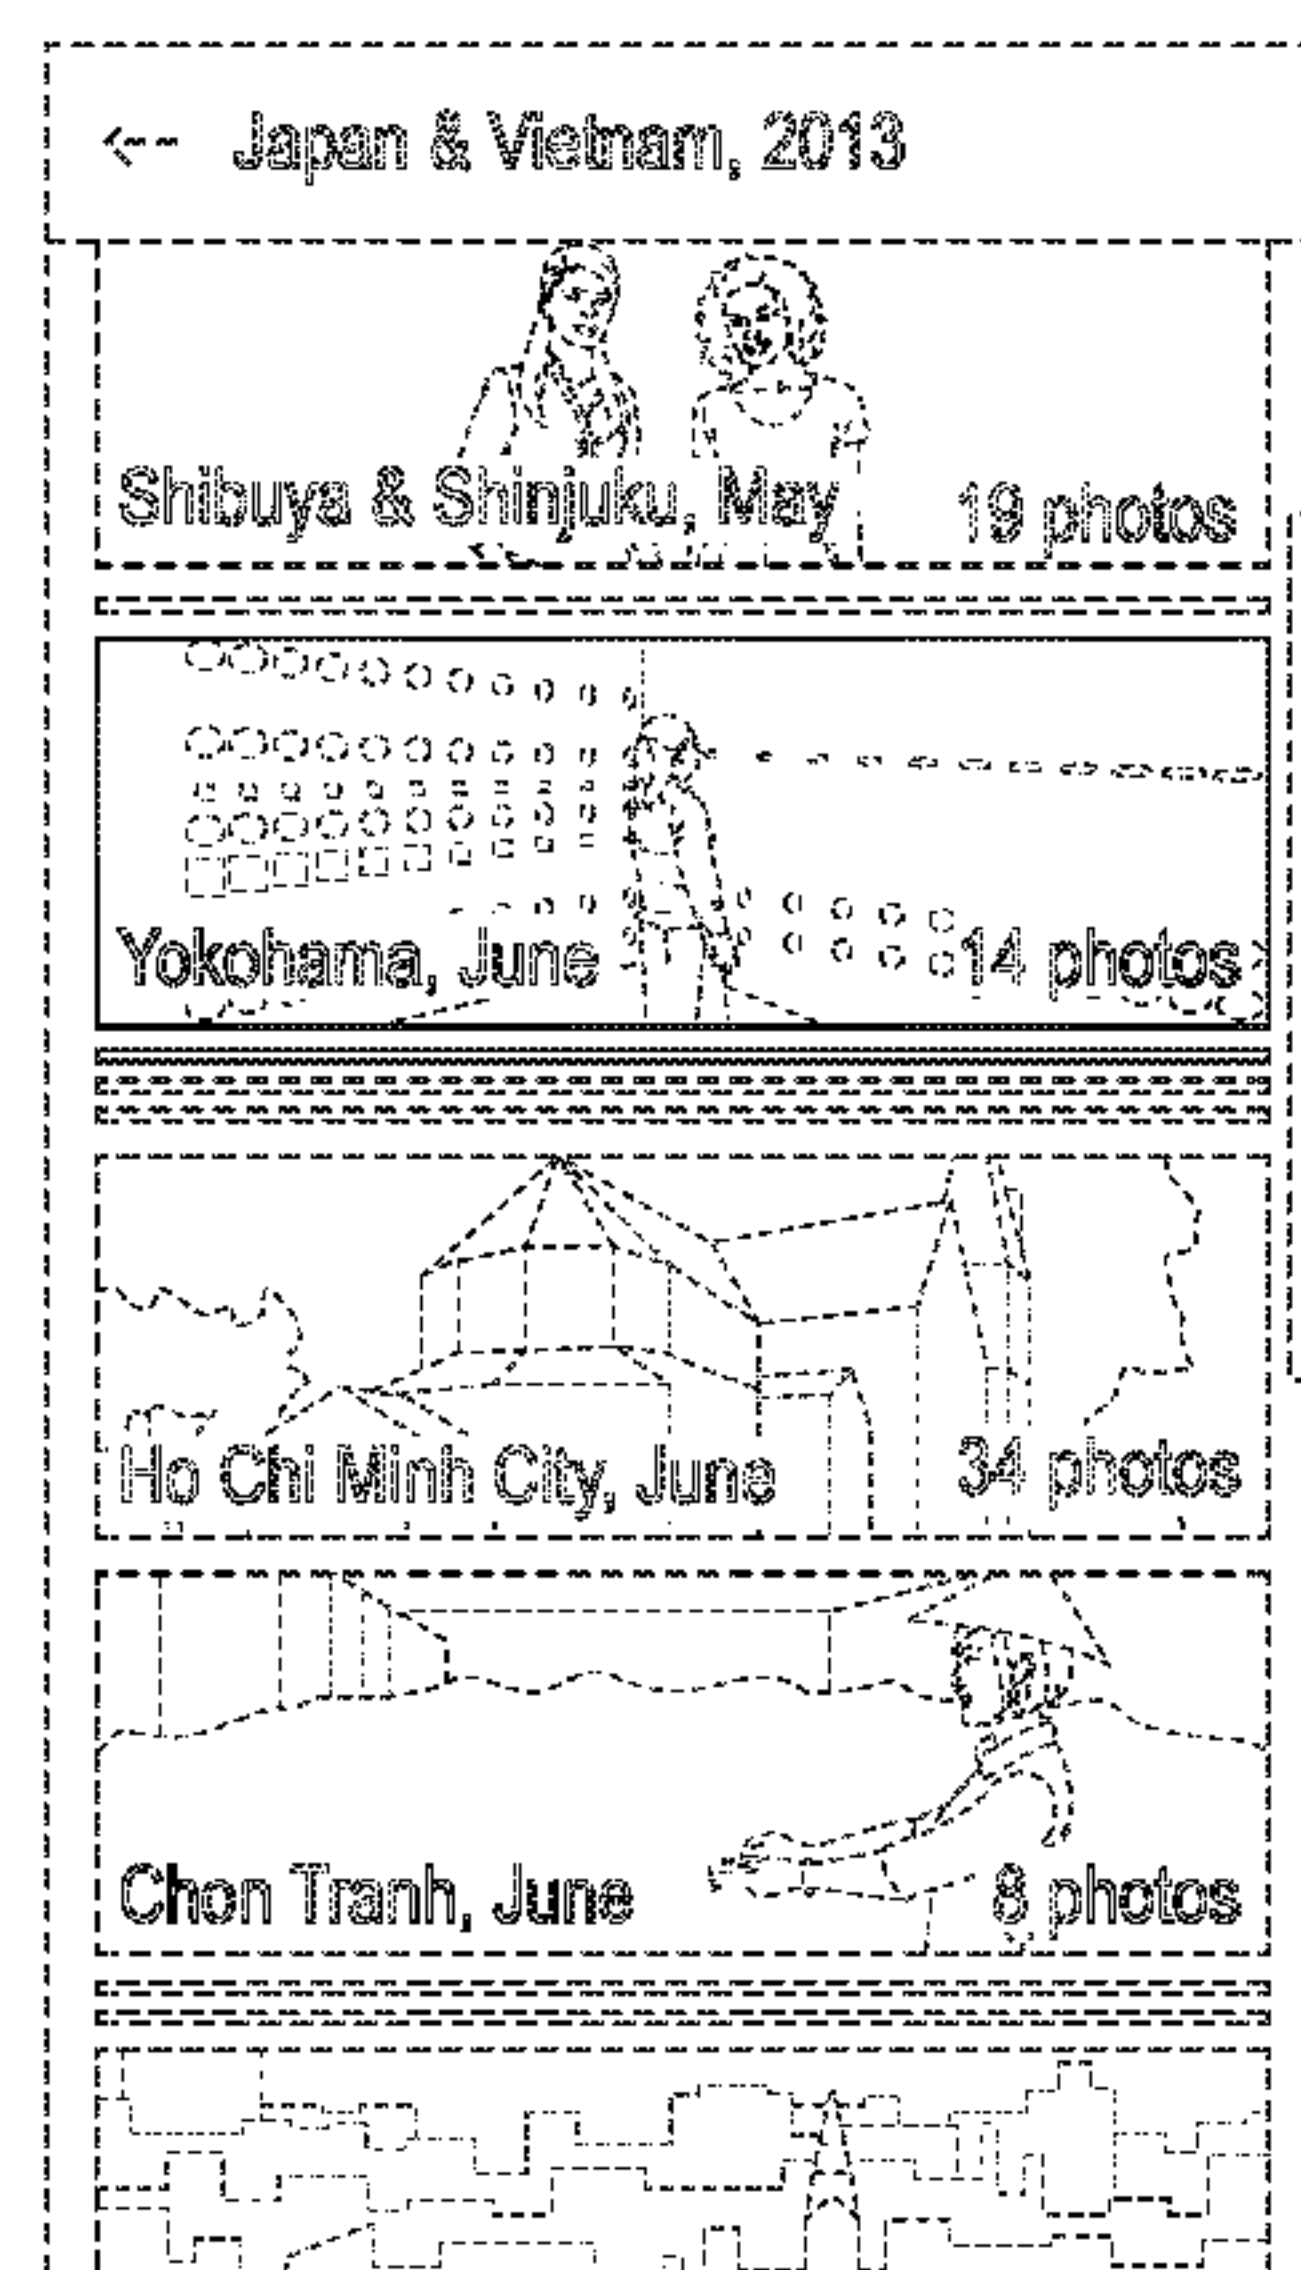

FIG. 3 is a front view of the third image thereof; and,

FIG. 4 is a front view of the fourth image thereof.

The broken lines form no part of the claimed design. The outer rectangle in broken lines is included to show an unclaimed portion of an example display screen and forms no part of the claimed design. The portions of the transitional graphical user interface shown in broken lines form no part of the claimed design.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-4. The subject matter of this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
