See application file for complete search history.

FIG. 1 is a frontal elevation view of the pagoda soap tower. FIG. 2 is a rear elevation view of the pagoda soap tower. FIG. 3 is a right side elevation view of the pagoda soap tower. The left side elevation view is identical to the right side view; and,

FIG. 4 is an internal top view of the undercarriage of the pagoda soap tower.

A bottom view of the undercarriage is omitted. The bottom of the undercarriage is flat and, except for the cabriole legs illustrated in FIGS. 1-3, unornamented.

Although the drawings are the design's best description, special description is provided regarding some features illustrated in FIGS. 1-3. The frontal, rear, and side elevation views of the pagoda soap tower show ornamental knobs (accent pulls) for sliding removable drawers on stories (levels) of the pagoda soap tower. The views also show an ornamental frieze that wraps around the circumference of stories (levels) of the pagoda soap tower. Stories (levels) of the pagoda soap tower are divided by roofs that curve upward at the corners. The pagoda soap tower also includes four decorative cabriole legs. For simplicity of illustration, the frontal elevation view illustrates the front two legs, the rear elevation view illustrates the two rear legs, and the side elevation view illustrates two legs (one of the front legs and one of the rear legs). In each view, the remaining two legs are omitted. The views of FIGS. 1-3 also include an ornamental gate. A latch on gate shown in the frontal elevation view distinguishes it from the rear elevation view.
