(57) **CLAIM**

The ornamental design for a display screen with graphical user interface for controlling machine tools, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of the image in a sequence for a display screen with graphical user interface for controlling machine tools, showing our new design;

FIG. 2 is a left side elevational view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is an enlarged view of the design in FIG. 1, showing the first image in a sequence;

FIG. 5 is an enlarged view of the design, showing the second image in a sequence;

FIG. 6 is an enlarged view of the design, showing the third image in a sequence; and,

FIG. 7 is an enlarged view of the design, showing the fourth image in a sequence.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 4-7. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken line showing of the display screen is for the purpose of illustrating portions of the display screen and forms no part of the claimed design.
