(57) **CLAIM**

The ornamental design for a swaddling garment, as shown and described.

DESCRIPTION

FIG. 1 is a front, top, and left side perspective view of a closed swaddling garment according to a first embodiment;
 FIG. 2 is a front elevational view thereof;

FIG. 3 is a rear elevational view thereof;
 FIG. 4 is a top plan view thereof;
 FIG. 5 is a bottom plan view thereof;
 FIG. 6 is a left side elevational view thereof;
 FIG. 7 is a right side elevational view thereof;
 FIG. 8 is a front elevational view of a fully open swaddling garment according to the first embodiment;
 FIG. 9 is a front elevational view of a partially open swaddling garment with both wings open according to the first embodiment;
 FIG. 10 is a front elevational view of a partially open swaddling garment with one wing open according to the first embodiment;
 FIG. 11 is a front, top, and left side perspective view of the closed swaddling garment in use according to the first embodiment;
 FIG. 12 is a front, top, and left side perspective view of the closed swaddling garment in use with a bottom portion open according to the first embodiment;
 FIG. 13 is a front elevational view of a partially open swaddling garment with both wings open according to a second embodiment;
 FIG. 14 is a rear elevational view of a partially open swaddling garment with both wings open according to the second embodiment;
 FIG. 15 is a right side elevational view of a partially open swaddling garment with both wings open according to the second embodiment;
 FIG. 16 is a front elevational view of a closed swaddling garment according to the second embodiment;
 FIG. 17 is a right side elevational view of a closed swaddling garment according to the second embodiment;
 FIG. 18 is a front elevational view of a partially open swaddling garment with both wings open according to a third embodiment;
 FIG. 19 is a rear elevational view of a partially open swaddling garment with both wings open according to the third embodiment;
 FIG. 20 is a right side elevational view of a partially open swaddling garment with both wings open according to the third embodiment;
 FIG. 21 is a front elevational view of a closed swaddling garment according to the third embodiment;

(Continued)

FIG. 22 is a right side elevational view of a closed swaddling garment according to the third embodiment;

FIG. 23 is a front elevational view of a partially open swaddling garment according to a fourth embodiment;

FIG. 24 is a rear elevational view of a partially open swaddling garment with both wings open according to the fourth embodiment;

FIG. 25 is a right side elevational view of a partially open swaddling garment with both wings open according to the fourth embodiment;

FIG. 26 is a front elevational view of a partially open swaddling garment with both wings open according to a fifth embodiment;

FIG. 27 is a rear elevational view of a partially open swaddling garment with both wings open according to the fifth embodiment; and,

FIG. 28 is a right side elevational view of a partially open swaddling garment with both wings open according to the fifth embodiment.

The broken lines in the drawings showing portions of the swaddling garment are included for the purpose of illustrating environmental structure and form no part of the claimed design.
