(57) **CLAIM**

The ornamental design for a double metal capped shotgun shells, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a first embodiment of a double metal capped shotgun shells;

FIG. 2 is a front elevation view of the first embodiment thereof, the rear elevation, the left side, and the right side views of the first embodiment being an identical image thereof;

FIG. 3 is a top plan view of the first embodiment thereof, the bottom plan view of the first embodiment being an identical image thereof;

FIG. 4 is a front elevation view of the first embodiment thereof, shown in use;

FIG. 5 is a front elevation view of the first embodiment thereof, shown in an alternative use;

FIG. 6 is a perspective view of a second embodiment of the double metal capped shotgun shells;

FIG. 7 is a front elevation view of the second embodiment thereof, the rear elevation, the left side, and the right side views of the second embodiment being an identical image thereof;

FIG. 8 is a top plan view of the second embodiment thereof, the bottom plan view of the first embodiment being an identical image thereof;

FIG. 9 is a front elevation view of the second embodiment thereof, shown in use;

FIG. 10 is a front elevation view of the second embodiment thereof, shown in an alternative use;

FIG. 11 is a perspective view of a third embodiment of the double metal capped shotgun shells;

FIG. 12 is a front elevation view of the third embodiment thereof, the rear elevation, the left side, and the right side views of the third embodiment being an identical image thereof;

FIG. 13 is a top plan view of the third embodiment thereof, the bottom plan view of the first embodiment being an identical image thereof;

FIG. 14 is a front elevation view of the third embodiment thereof, shown in use; and,

FIG. 15 is a front elevation view of the third embodiment thereof, shown in an alternative use.

The broken lines shown in the drawings illustrate portions of the double metal capped shotgun shells that form no part of the claimed design.

The cutaway symbols illustrated in break lines in the drawings indicate a symbolic break in the length of the design for the double metal capped shotgun shells indicating an inde-

(Continued)

terminate length. The appearance of any portion of the article between the break lines forms no part of the claimed design.
