(57) **CLAIM**

The ornamental design for a display screen with a graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with a graphical user interface showing a first image in a sequence during a changing state of the graphical user interface; FIG. 2 is a front view of the display screen with a graphical user interface showing a second image in the sequence of the changing state of the graphical user interface; and, FIG. 3 is a front view of the display screen with a graphical user interface showing a final image in the sequence of the changing state of the graphical user interface. The rear view of the display screen with a graphical user interface is omitted and forms no part of the claimed design because it is unornamented. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-3. The process or period in which one image transitions to another image forms no part of the claimed design. The outermost solid line in the figures represents the display screen, which forms part of the claimed design.

1 Claim, 3 Drawing Sheets

FIG. 1

FIG. 2

FIG. 3
