FIG. 1 is a first image of a display screen with animated graphical user interface;

FIG. 2 is a second image thereof;

FIG. 3 is a third image thereof; and,

FIG. 4 is a fourth image thereof.

The broken lines illustrate a mobile electronic device as well as portions of a graphical user interface. The broken lines form no part of the claimed design. The process or period in which one image transitions to another forms no part of the claimed design. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-4, and in a second embodiment, FIGS. 4-1. Tonal shading shown in the drawings which depicts the illusion of overlapping elements is a visual feature of the graphical user interface and is included in the claimed design.
