(57) **CLAIM**

The ornamental design for a display screen with graphical user interface for account switching by tap, as shown and described.

DESCRIPTION

The present application is related to U.S. Design patent application Ser. No. 29/494,603, filed concurrently herewith, the entire disclosures of which are incorporated herein by reference.

FIG. 1 is a front view of a first image in the sequence for a display screen with graphical user interface for account switching by tap according to a first embodiment.

FIG. 2 is a front view of a second image of the first embodiment.

FIG. 3 is a front view of a third image of the first embodiment.

FIG. 4 is a front view of a fourth image of the first embodiment.

FIG. 5 is a front view of a fifth image of the first embodiment.

FIG. 6 is a front view of a sixth image of the first embodiment.

FIG. 7 is a front view of a seventh image of the first embodiment.

FIG. 8 is a front view of an eight image of the first embodiment.

FIG. 9 is a front view of a first image in the sequence for a display screen with graphical user interface for account switching by tap according to a second embodiment.

FIG. 10 is a front view of a second image of the second embodiment.

FIG. 11 is a front view of a third image of the second embodiment.

FIG. 12 is a front view of a fourth image of the second embodiment.

FIG. 13 is a front view of a fifth image of the second embodiment.

(Continued)

FIG. 14 is a front view of a sixth image of the second embodiment.

FIG. 15 is a front view of a seventh image of the second embodiment; and,

FIG. 16 is a front view of an eighth image of the second embodiment.

In embodiments of the design, the images shown in FIGS. 1-16 include images of a display screen with graphical user interface for account switching by tap. The appearance of the image transitions sequentially between the images shown in each respective embodiment. In the first embodiment, the appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-8. In the second embodiment, the appearance of the transitional image sequentially transitions between the images shown in FIGS. 9-16. The process or period in which an image transitions to another forms no part of the claimed design. The outermost solid line in the figures represents the display screen, which forms part of the claimed design. The text shown in broken lines and all other broken lines showing portions of the graphical user interface are environmental and form no part of the claimed design.
