(57) **CLAIM**

The ornamental design for a quilt braid cutting template, as shown and described.

DESCRIPTION

FIG. 1 is a top view of the cutting template design showing instructive lettering and numbering in the English language, but such are for illustrative purposes and may take other language forms; and,
FIG. 2. is a top, left side and bottom side view of the new cutting template design showing the layout and thickness of the clear acrylic material.

My quilt braid cutting template design includes instructive numbering, lettering and lines to aid in the measurement and cutting of fabric pieces to be joined together to make a quilt. The printed lines, with their associated numbers, represent measurements from the respective sides of the cutting template. For example, the lines noted with numbers 6 through 8 on the right side of the template (closest to the 45° angled edge) are measurements from the left side of the template.
