(57) **CLAIM**

The ornamental design for an automotive system calibrating apparatus, as shown and described.

DESCRIPTION

Cross reference is made to copending U.S. design patent application Ser. No. 29/530,631 entitled “Automotive System Calibrating Apparatus” by Wang, which was filed on Jun. 18, 2015; and U.S. design patent application Ser. No. 29/532,553 entitled “Automotive System Calibrating Apparatus” by Leikert et al., which was filed on Jul. 8, 2015.

FIG. 1 is a front perspective view of an automotive system calibrating apparatus showing our new design;

FIG. 2 is a front elevational view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 3 is a rear elevational view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 4 is a left side elevational view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 5 is a right side elevational view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 6 is a top plan view showing the design for the automotive system calibrating apparatus of FIG. 1; and,

FIG. 7 is a bottom plan view showing the design for the automotive system calibrating apparatus of FIG. 1.

The broken lines shown in the drawings illustrate portions of the automotive system calibrating apparatus that form no part of the claimed design.
