(57) CLAIM

The ornamental design for catheter adhesive device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a catheter adhesive device showing my new design in place and fully securing a catheter and luer connector extension set; FIG. 2 is a top plan view thereof with an adhesive tab removed from the luer connector extension set, exposing adhesive, and a portion of the catheter adhesive device partially securing a catheter; FIG. 3 is a bottom plan view thereof with an adhesive protection partially removed from the bottom of the catheter adhesive device; FIG. 4 is a bottom plan view thereof with adhesive protection partially removed from adhesive on the bottom of the catheter adhesive device; FIG. 5 is a side elevation view thereof with all adhesive protection in place; FIG. 6 is a top plan view thereof with the adhesive protection fully removed from the adhesive tabs; FIG. 7 is a bottom plan view thereof with the adhesive protection fully removed; FIG. 8 is a perspective view of a catheter adhesive device showing my new design, according to an alternate embodiment, in place and fully securing a catheter and liter connector extension set; FIG. 9 is a top plan view thereof with an adhesive tab removed from the luer connector extension set, exposing adhesive, and a portion of the catheter adhesive device partially securing a catheter; FIG. 10 is a bottom plan view thereof with an adhesive protection partially removed from the bottom of the catheter adhesive device; FIG. 11 is a bottom plan view thereof with adhesive protection partially removed from adhesive on the bottom of the catheter adhesive device; FIG. 12 is a side elevation view thereof with all adhesive protection in place; FIG. 13 is a top plan view thereof with the adhesive protection fully removed from the adhesive tabs; and, FIG. 14 is a bottom plan view thereof with the adhesive protection fully removed. The broken lines in the figures illustrate environmental structures and portions of the design that form no part of the claimed design. Stippling represents exposed adhesive.
