(57) **CLAIM**

The ornamental design for a display screen with graphical user interface or portion thereof, as shown and described.

DESCRIPTION

The present application is related to U.S. patent application Ser. No. 29/488,692, filed concurrently herewith, and to U.S. patent application Ser. No. 29/488,692, filed concurrently herewith, the entire disclosures of which are incorporated herein by reference.

FIG. 1 is a front view of an image in a sequence for a display screen with graphical user interface or portion thereof, according to our new design;

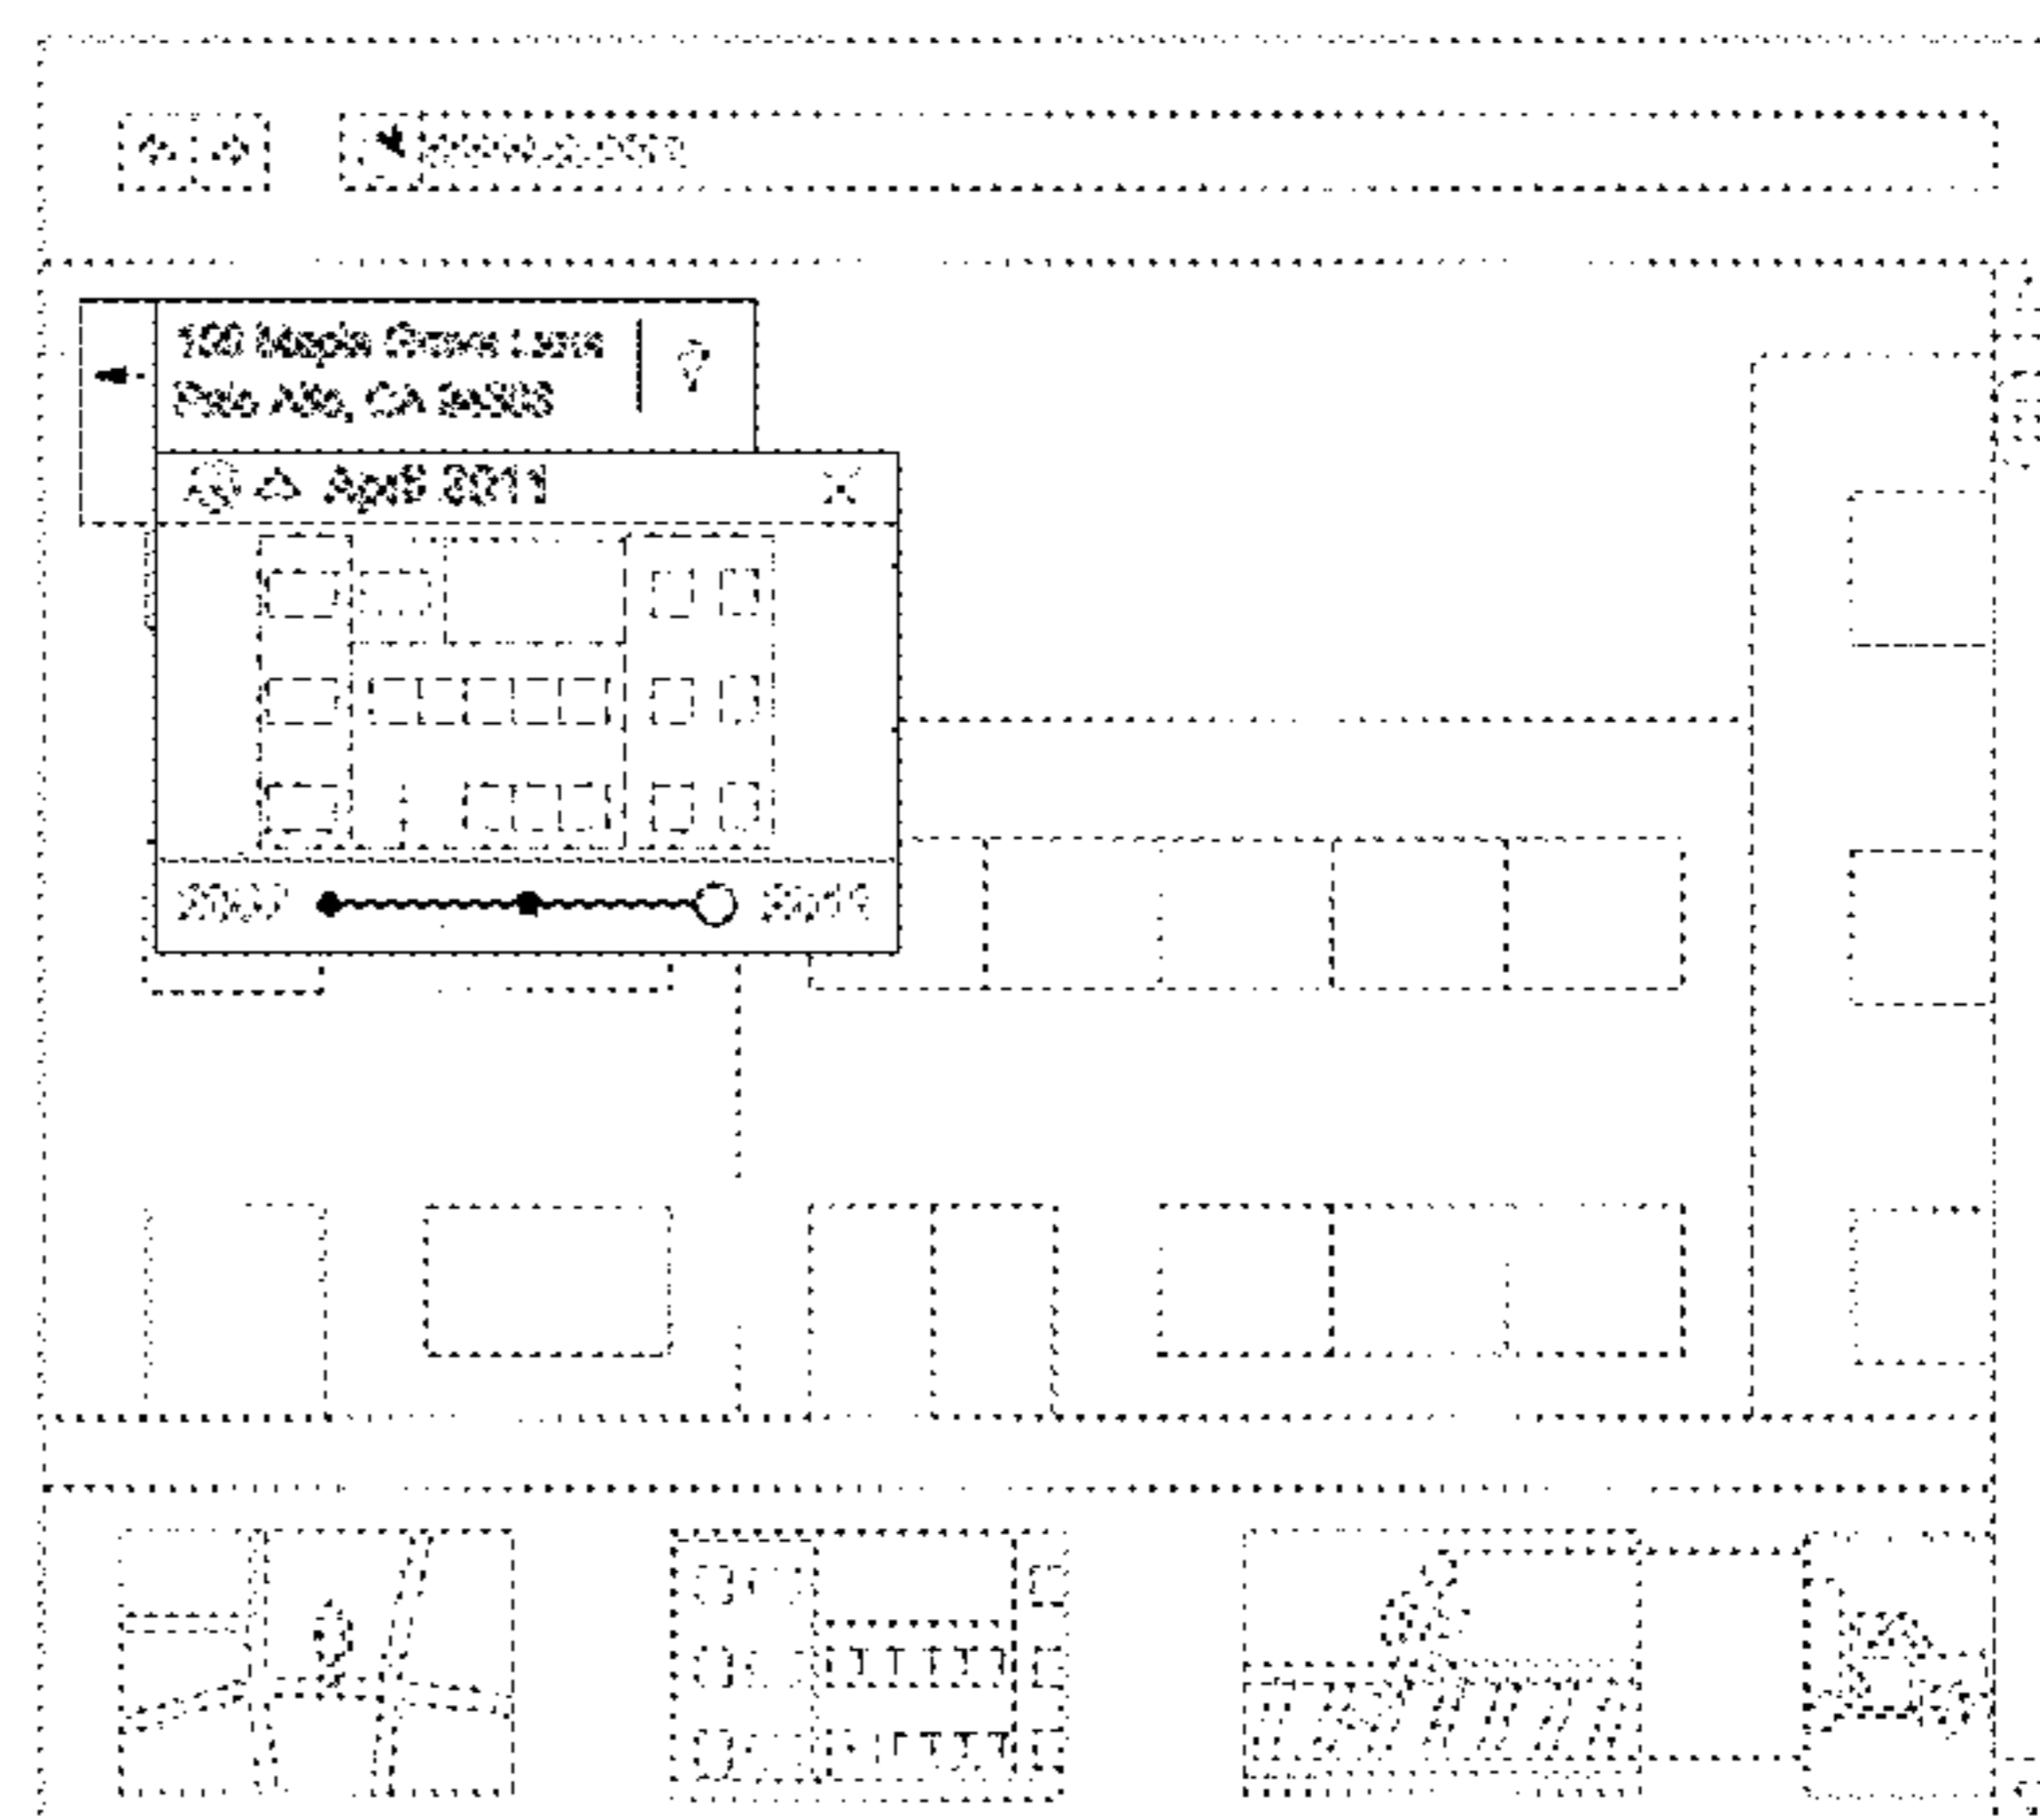

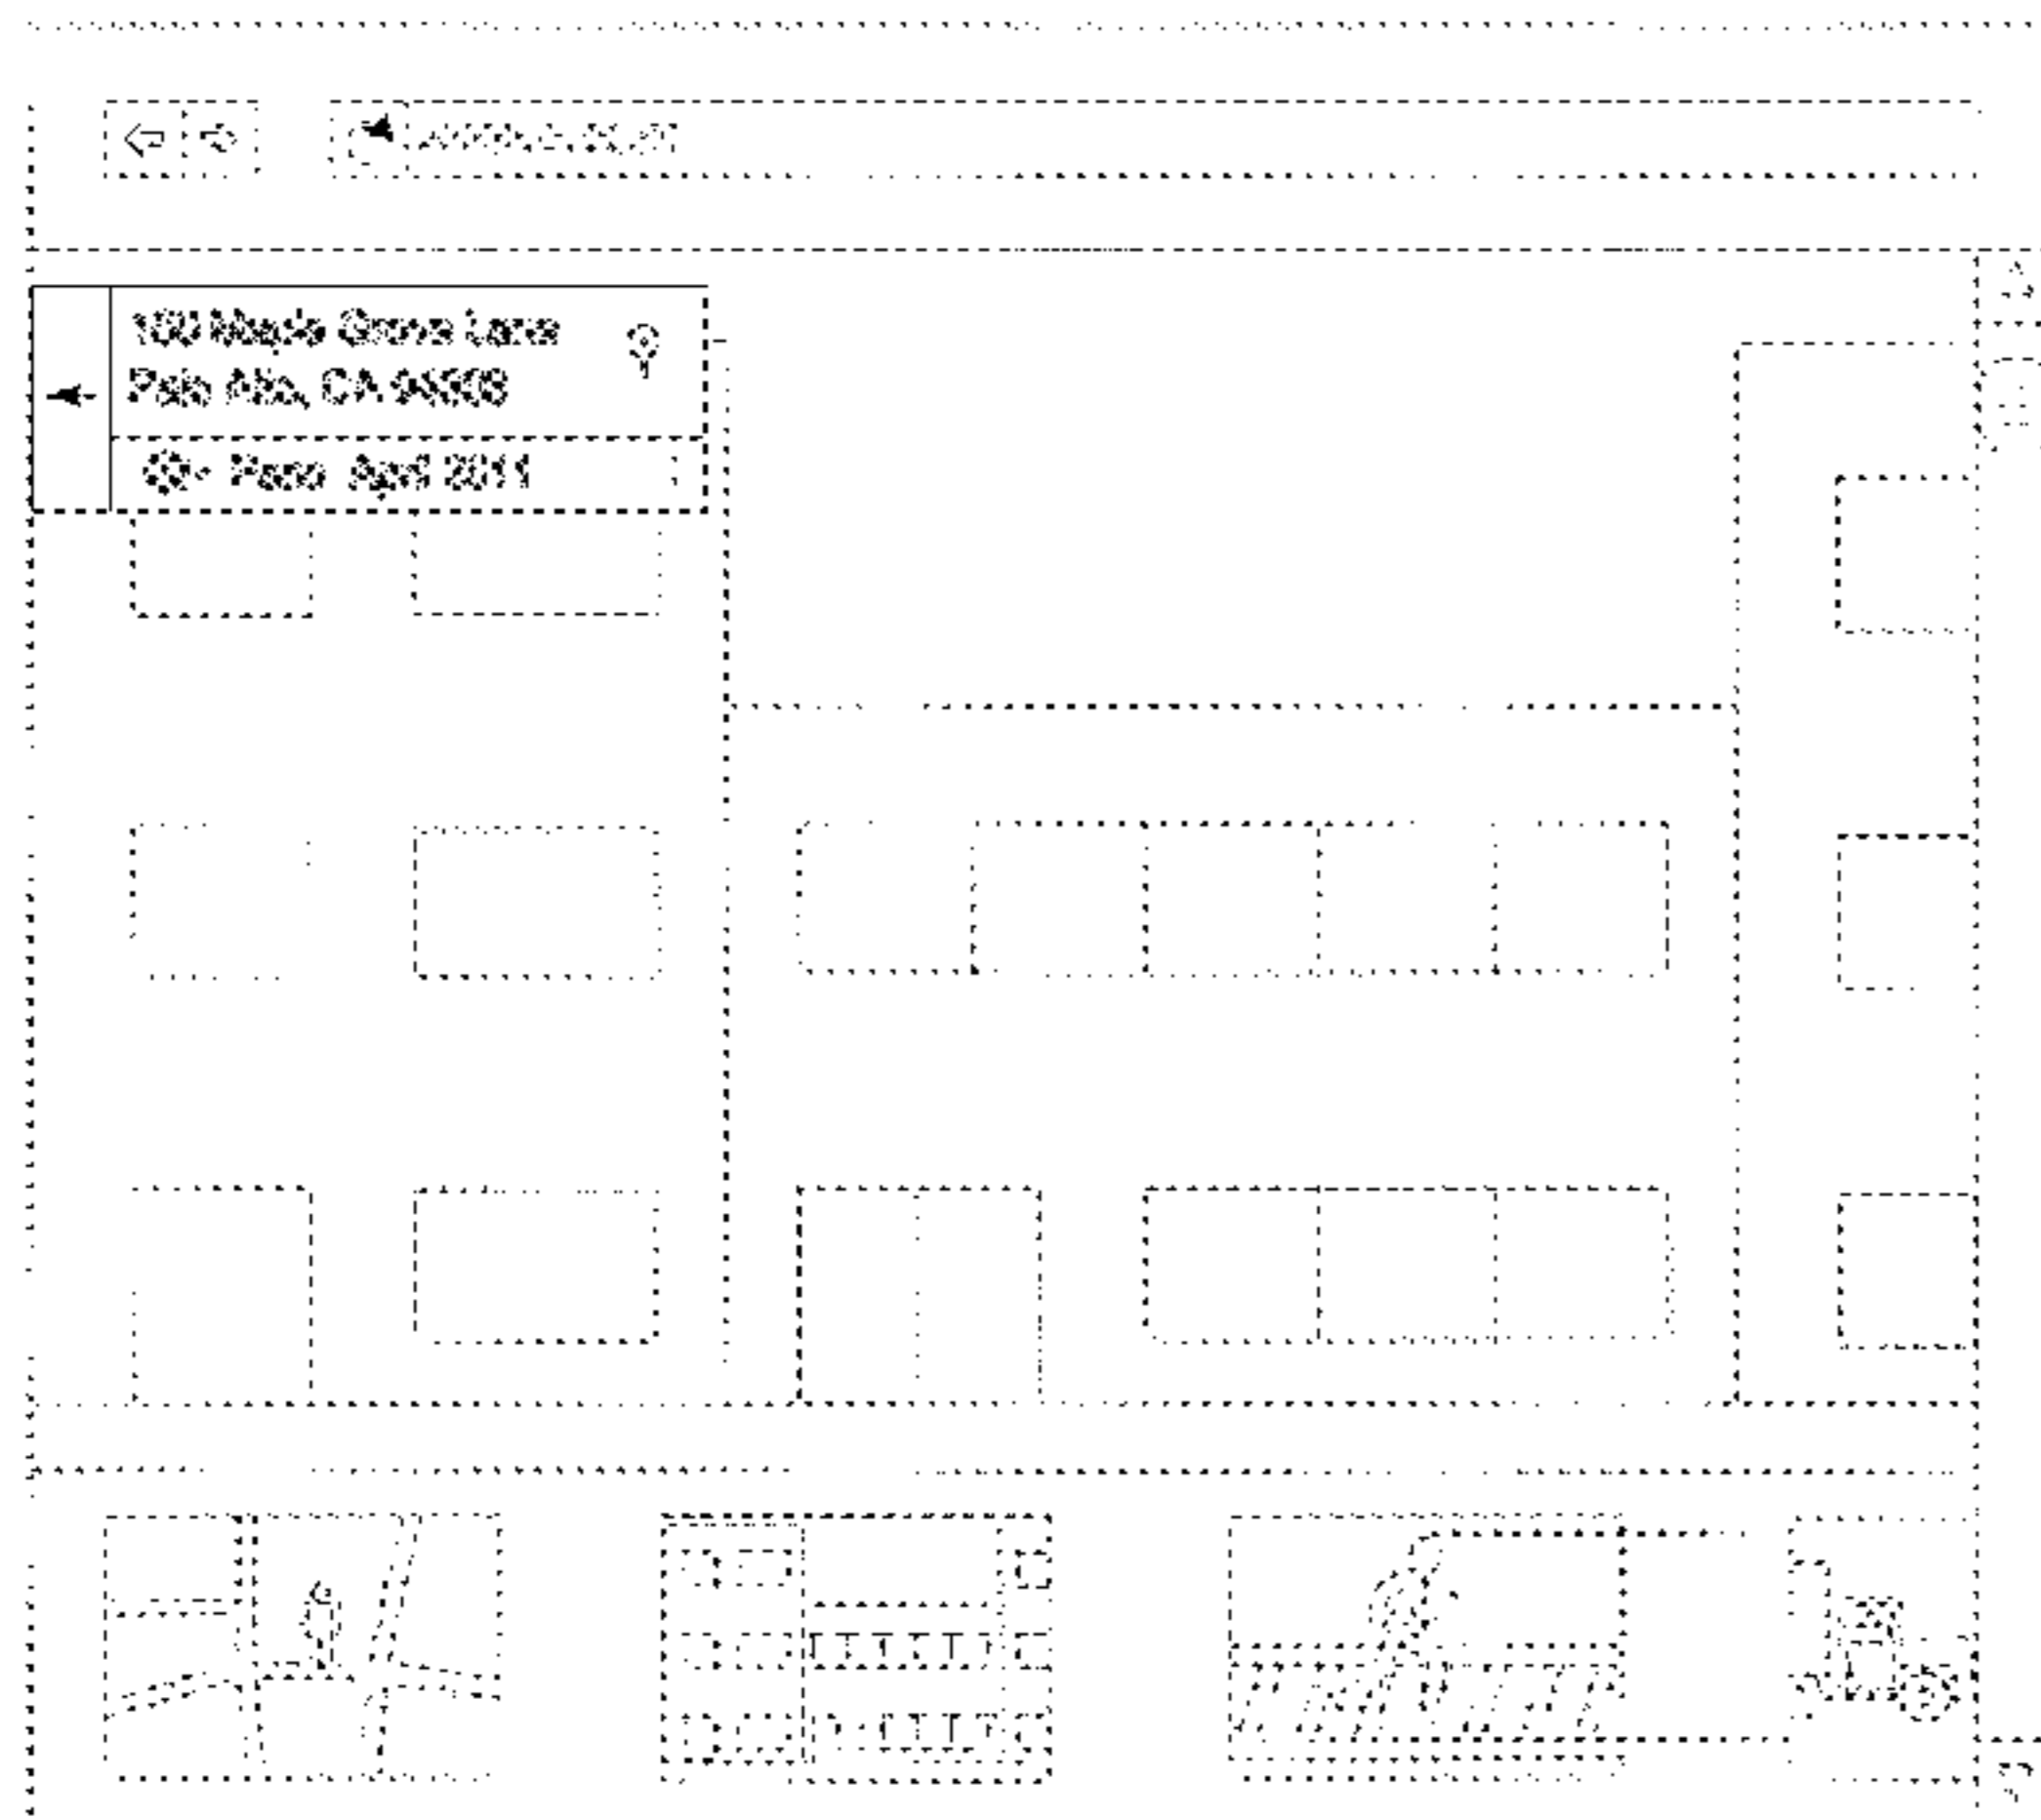

FIG. 2 is a front view of a second image of the design; FIG. 3 is a front view of a third image of the design; FIG. 4 is a front view of a fourth image of the design; FIG. 5 is a front view of a fifth image of the design; FIG. 6 is a front view of a sixth image of the design; and, FIG. 7 is a front view of a seventh image of the design.

The outermost broken line rectangle showing a display screen, and the broken line showing of text and other features are included for the purpose of illustrating portions of the article and form no part of the claimed design.

The appearance of the image sequentially transitions between the images shown in FIGS. 1-7. The process or period in which one image transitions to another image forms no part of the claimed design.

Areas of the design shown with a stipple fill illustrate a visual contrast compared to the non-filled areas.
