DESCRIPTION

The present application is related to U.S. patent application
Ser. No. 29/452,332 entitled “Design for a High Surface
Area Ash Removal Screen,” filed Apr. 15, 2013, the disclo-
sure of which is incorporated herein by reference.
FIG. 1 is a front perspective view of a coated screen for large
particle ash control showing our new design;
FIG. 2 is a front elevation view thereof;
FIG. 3 is a back elevation view thereof;
FIG. 4 is a right elevation view thereof;
FIG. 5 is a left elevation view thereof;
FIG. 6 is a top plan view thereof; and,
FIG. 7 is a bottom plan view thereof.
FIGS. 1-7 show our new design. FIGS. 1-7 show the
embodiment of a coated screen for large particle ash control
that comprises three semi-elliptical cylinder surfaces having
hexagonal holes perforating the surfaces.
It should be understood that the labels used herein for
describing orientation (e.g., front, back, top, bottom, right,
and left) are merely for reference, and the embodiments of
our design may be disposed in any manner and still be within
the scope of the present invention. In the FIGURES, struc-
ture represented by broken lines are for illustrative purposes
only and form no part of the claimed design.
