(57) **CLAIM**

The ornamental design for an articlatable joint for accessory mount, as shown and described.

#### DESCRIPTION

FIG. 1 is an assembly view of first and second components of the articlatable joint for accessory mount, including environmental structure to which the articlatable joint for accessory mount may be secured;

FIG. 2 is a front assembly view of first and second components of the articlatable joint for accessory mount;  
FIG. 3 is a rear assembly view of the first and second components of the articlatable joint for accessory mount;  
FIG. 4 is a front perspective exploded assembly view of first and second components of the articlatable joint for accessory mount;  
FIG. 5 is a front perspective view of the first component of the articlatable joint for accessory mount;  
FIG. 6 is a rear lower perspective view of the first component of the articlatable joint for accessory mount; and  
FIG. 7 is a rear upper perspective view of the first component of the articlatable joint for accessory mount;  
FIG. 8 is a first end elevational view of the first component of the articlatable joint for accessory mount;  
FIG. 9 is a second end elevational view of the first component of the articlatable joint for accessory mount;  
FIG. 10 is a top plan view of the first component of the articlatable joint for accessory mount;  
FIG. 11 is a bottom plan view of the first component of the articlatable joint for accessory mount;  
FIG. 12 is a rear elevational side view of the first component of the articlatable joint for accessory mount;  
FIG. 13 is a front elevational side view of the first component of the articlatable joint for accessory mount;  
FIG. 14 is a rear perspective view of the second component of the articlatable joint for accessory mount;  
FIG. 15 is a front lower perspective view of the second component of the articlatable joint for accessory mount;  
FIG. 16 is a front upper perspective view of the second component of the articlatable joint for accessory mount;  
FIG. 17 is a first end elevational view of the second component of the articlatable joint for accessory mount;  
FIG. 18 is a second end elevational view of the second component of the articlatable joint for accessory mount;  
FIG. 19 is a top plan view of the second component of the articlatable joint for accessory mount;  
FIG. 20 is a bottom plan view of the second component of the articlatable joint for accessory mount;  
FIG. 21 is a front side elevational view of the second component of the articlatable joint for accessory mount; and,  
FIG. 22 is a rear side elevational view of the second component of the articlatable joint for accessory mount.

(Continued)

The broken line showing of environmental structure is for illustrative purposes only, and forms no part of the claimed design.
