(57) **CLAIM**

The ornamental design for an automotive wheel, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an automotive wheel, showing my new design; and, FIG. 2 is a front view thereof.

The broken lines in the drawings for the spokes, lug holes and outer rim of the wheel are included to depict environmental subject matter only and form no part of the claimed design. Applicant disclaims the surface of the wheel from the outer rim to the line that defines the ten recessed portions of the central hub area. Applicant claims the surfaces defined within the central hub area, but disclaims the lug holes as shown. With respect to the five-pointed star-shaped cap, the broken lines inside the cap in the form of a five-point star is an edge line that is disclaimed, while the surface of the star-shaped cap on either side of said edge line is a claimed surface.

1 Claim, 2 Drawing Sheets
