FIG. 1 is a bottom view of the open invention.
FIG. 2 is a perspective view of the open invention shown
mounted.
FIG. 3 is a front elevation view of the closed invention.
FIG. 4 is a front elevation view of the open invention.
FIG. 5 is a perspective front view of the open invention,
shown mounted.
FIG. 6 is a side perspective view of the closed invention.
FIG. 7 is a side perspective view of the invention, mounted
in an alternative manner; and,
FIG. 8 is a rear perspective view of the open invention,
mounted for display.

The invention has an “open” and a “closed” position. Shown
in FIG. 4, the open position is the position in which the
invention is unfolded so the flaps on its bottom can clasp an
armrest. In the closed position, best seen in FIG. 3, the
invention folds flat. The invention is used in the open
position, and stored in the closed position.
