(57) **CLAIM**

The ornamental design for a single-dose water-soluble capsule for cleaning products, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a single-dose water-soluble capsule for cleaning products showing my new design as viewed from the front, top, and right side;

FIG. 2 is a top plan view thereof;

FIG. 3 is a front view thereof; and,

FIG. 4 is a right side view of the capsule thereof.

A bottom view is omitted since the bottom view is the same as the top plan view shown in FIG. 2.

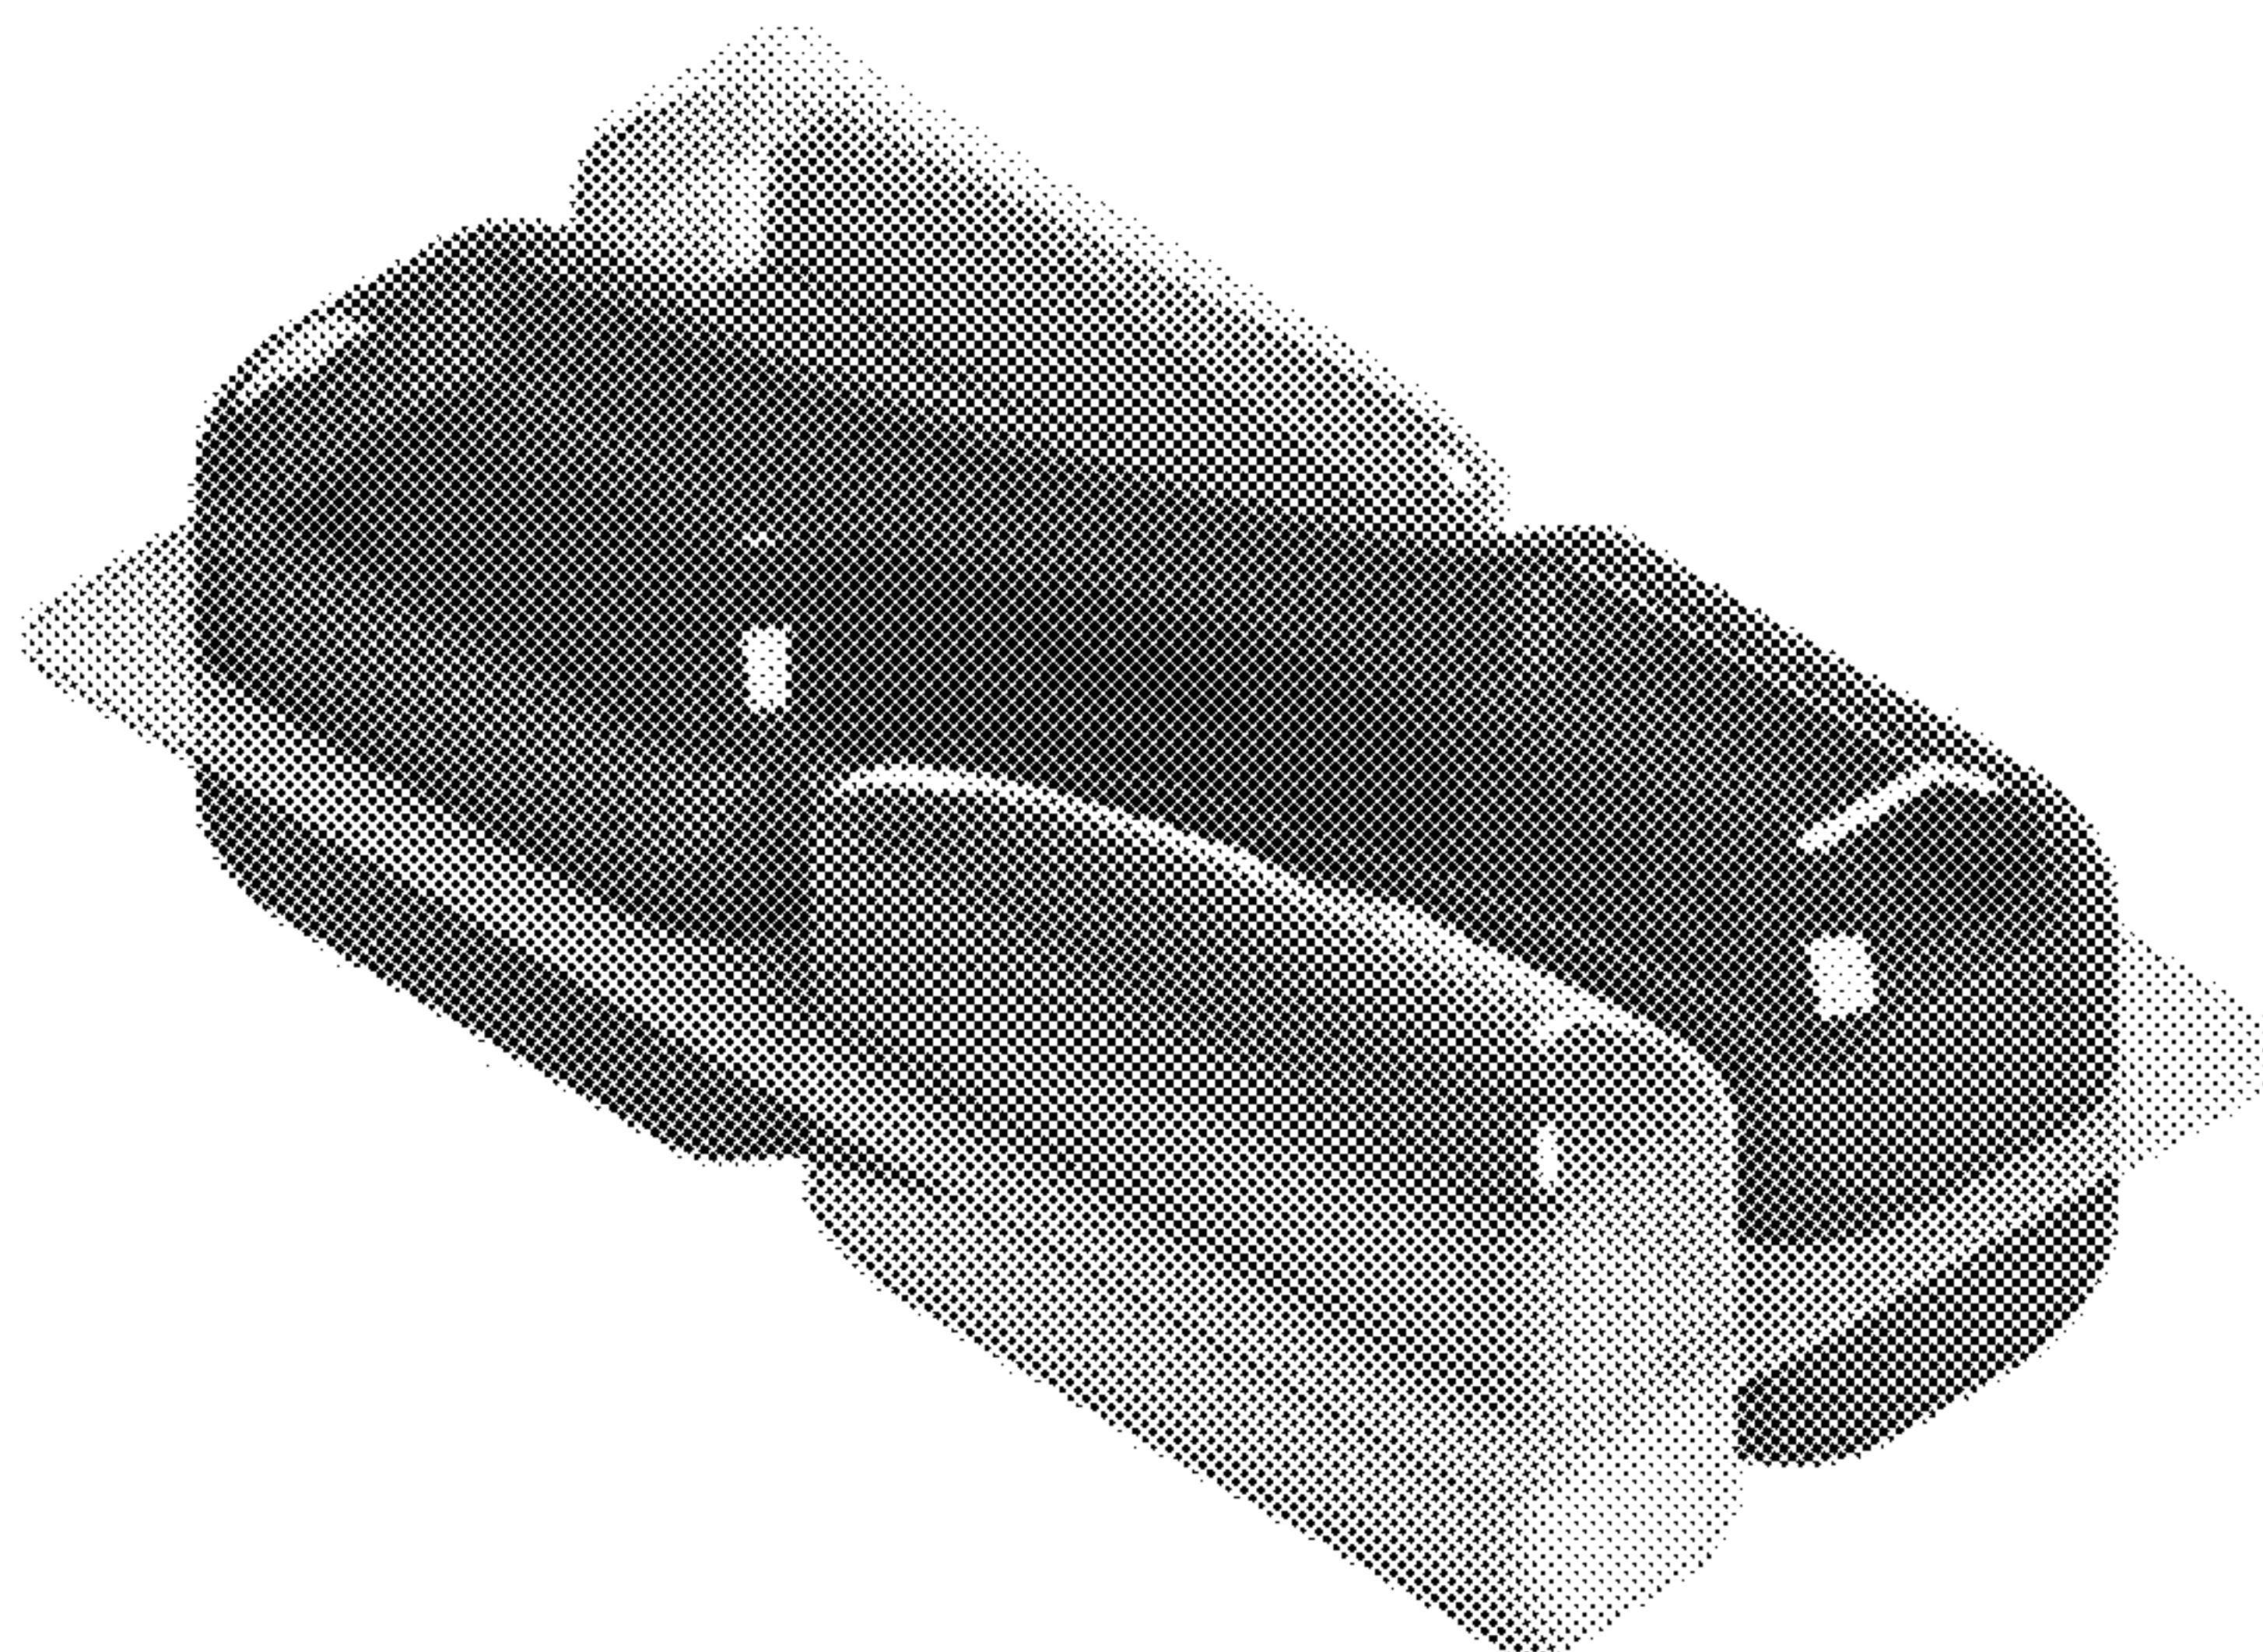

A rear view is omitted since the rear of the capsule is the same as the front of the capsule, which can be seen in FIG. 3; and

A left side view is omitted since the left side view is the same as the right side view shown in FIG. 4.

The design shows a capsule in a rectangular prism shape having two angled cuts that conform three components independently vacuum packed in a thin film, transparent package. The capsule has all its edges rounded.

One of the components forms the main body of the capsule and comprises two opposite diagonal corners of the rectangular shape, the other two diagonal corners being the other two components respectively, which are identical and have triangular prism shapes, the side on the longer side of the rectangular prism being considerably much longer than the side on the shorter side of the rectangular prism.
