(57) **CLAIM**

The ornamental design for a digital camera display screen with transitional graphical user interface, as shown and described.

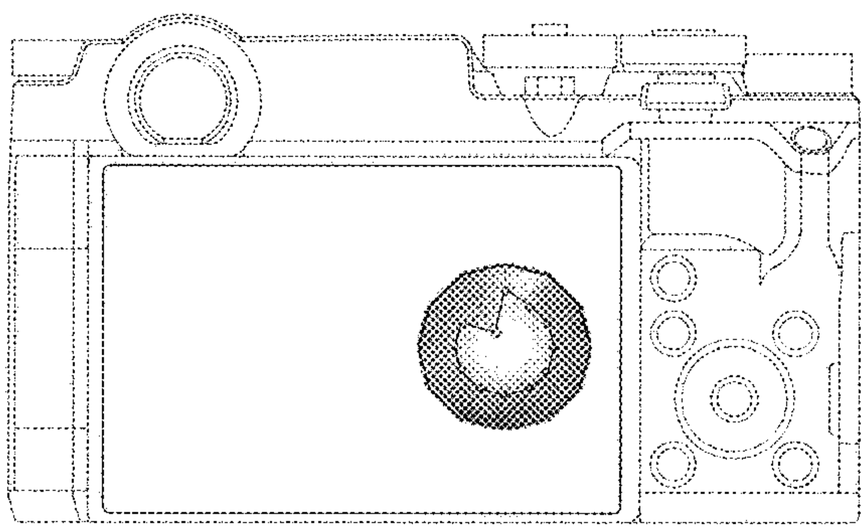
DESCRIPTION

FIG. **1** is a rear elevational view of a first image in a sequence for a digital camera display screen with transitional graphical user interface showing our new design;

FIG. **2** is a rear elevational view thereof showing a second image of our new design, a transitional sequence of the first embodiment being between FIGS. **1** and **2** respectively;

FIG. **3** is a rear elevational view thereof showing a third image of our new design, a transitional sequence of the second embodiment being between FIGS. **2** and **3** respectively;

(Continued)



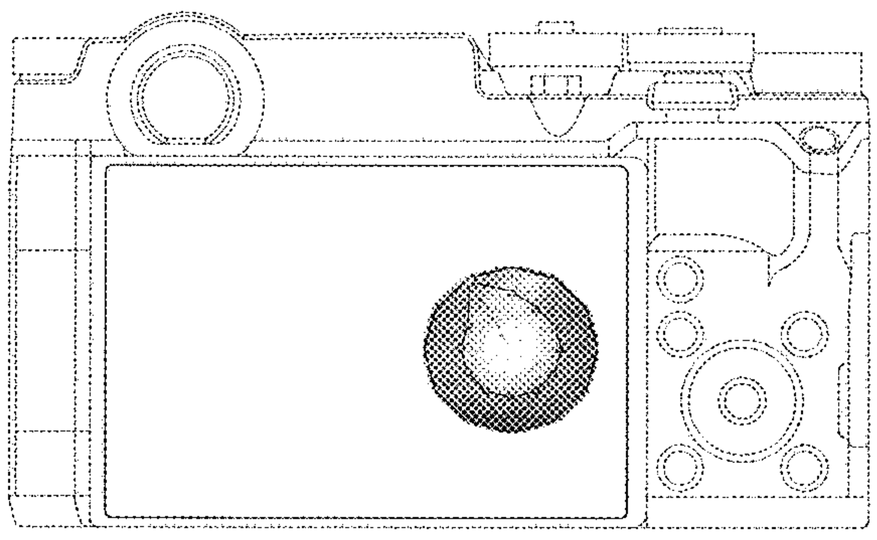


FIG. **4** is a rear elevational view thereof showing a fourth image of our new design, a transitional sequence of the third embodiment being between FIGS. **2** and **4** respectively;
FIG. **5** is a rear elevational view thereof showing a fifth image of our new design, a transitional sequence of the fourth embodiment being between FIGS. **2** and **5** respectively;
FIG. **6** is a rear elevational view thereof showing a sixth image of our new design, a transitional sequence of the fifth embodiment being between FIGS. **3** and **6** respectively;
FIG. **7** is a rear elevational view thereof showing a seventh image of our new design, a transitional sequence of the sixth embodiment being between FIGS. **6** and **7** respectively;
FIG. **8** is a rear elevational view thereof showing an eighth image of our new design, a transitional sequence of the seventh embodiment being between FIGS. **6** and **8** respectively;
FIG. **9** is a front elevational view of the digital camera;
FIG. **10** is a top plan view thereof;
FIG. **11** is a bottom plan view thereof;
FIG. **12** is a left side elevational view thereof; and,
FIG. **13** is a right side elevational view thereof.

Seven embodiments are shown, each consisting of a sequence that transitions between two figures. The appearance of the transitional image in the first embodiment sequentially transitions between the images shown in FIG. **1** to FIG. **2**. The appearance of the transitional image in the second embodiment sequentially transitions between the images shown in FIGS. **2** and **3**. The appearance of the transitional image in the third embodiment sequentially transitions between the images shown in FIGS. **2** and **4**. The appearance of the transitional image in the fourth embodiment sequentially transitions between the images shown in FIGS. **2** and **5**. The appearance of the transitional image in the fifth embodiment sequentially transitions between the images shown in FIGS. **3** and **6**. The appearance of the transitional image in the sixth embodiment sequentially transitions between the images shown in FIGS. **6** and **7**. The appearance of the transitional image in the seventh embodiment sequentially transitions between the images shown in FIGS. **6** and **8**.

The broken line showing of the digital camera is for the purpose of illustrating environmental structure and forms no part of the claimed design.
