(57) **CLAIM**

The ornamental design for a portion of display having graphical user interface with transitional icon, as shown and described.

DESCRIPTION

FIG. 1 is a face view of a portion of display having graphical user interface with transitional icon, showing our new design, according to a first embodiment of the design and illustrating a first image of the first embodiment.

FIG. 2 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating a second image thereof.

FIG. 3 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating a third image thereof.

FIG. 4 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating a fourth image thereof.

FIG. 5 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating a fifth image thereof.

FIG. 6 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating a sixth image thereof.

FIG. 7 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating a seventh image thereof.

FIG. 8 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating an eighth image thereof.

FIG. 9 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating a ninth image thereof.

FIG. 10 is a face view of a portion of display having graphical user interface with transitional icon, according to the first embodiment and illustrating a tenth image thereof.

FIG. 11 is a face view of a portion of display having graphical user interface with transitional icon, showing our new design, according to a second embodiment of the design and illustrating a first image of the second embodiment.

FIG. 12 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating a second image thereof.

(Continued)

FIG. 13 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating a third image thereof.

FIG. 14 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating a fourth image thereof.

FIG. 15 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating a fifth image thereof.

FIG. 16 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating a sixth image thereof.

FIG. 17 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating a seventh image thereof.

FIG. 18 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating an eighth image thereof.

FIG. 19 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating a ninth image thereof; and,

FIG. 20 is a face view of a portion of display having graphical user interface with transitional icon, according to the second embodiment and illustrating a tenth image thereof.

The appearance of the transitional icon sequentially transitions among the images shown in FIGS. 1-10 or among the images shown in FIGS. 11-20. The process or period in which any image transitions to another image forms no part of the claimed design.

The broken line showing of a display with graphical user interface is included for the purpose of illustrating portions of the article and forms no part of the claimed design. The broken line showing of a tablet is included for the purpose of illustrating environmental structure and forms no part of the claimed design.
