U.S. PATENT DOCUMENTS

D275,386 S * 9/1984 Baus D12/596
D275,474 S * 9/1984 Graas D12/596

DESCRIPTION

FIG. 1 is a perspective view of the tire tread of our design; FIG. 2 is a front elevation view of the tire tread of our design; FIG. 3 is a side elevation view of the tire tread of our design; FIG. 4 is a side elevation view of the tire tread of our design, taken from the opposite side of that shown in FIG. 3; and, FIG. 5 is an enlarged, partial view of FIG. 1. In the drawings, the broken line disclosure of the tire sidewall and inner bead depicts environmental structure and forms no part of the claimed design. The dash-dot lines represent the peripheral boundary between the claimed tire tread and the unclaimed sidewall. The tread pattern is understood to repeat uniformly throughout the circumference of the tire, as shown schematically in solid lines.

1 Claim, 5 Drawing Sheets
