(57) **CLAIM**

The ornamental design for ceiling frame for screen, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a ceiling frame for screen according to a new design claimed in this application (“claimed design”);

FIG. 2 is a front side view of the present design, in this instance, a rear side view is omitted because it is a mirror image of the front side view;

FIG. 3 is a left side view of the present design;

FIG. 4 is a right side view of the present design;

FIG. 5 is a top view of the present design;

FIG. 6 is a bottom view of the present design; and,

FIG. 7 shows a state where the present design is installed. The installed screen and additional framework, depicted by the broken line in FIG. 7, have been shown for the purpose of illustrating an element that form no part of the claimed design.

The claimed ceiling frame for screen is equipped on the ceiling of a theater and is formed to have a cross section which is generally curved. The claimed design forms a theater frame which is generally curved with the screen as the center in order to enlarge spectators’ immersion.
