

US00D786471S

(12) **United States Design Patent**  
**Snell et al.**

(10) **Patent No.:** **US D786,471 S**

(45) **Date of Patent:** **\*\* \*May 9, 2017**

- (54) **TROFFER-STYLE LIGHT FIXTURE**
- (71) Applicant: **CREE, INC.**, Durham, NC (US)
- (72) Inventors: **Nathan Snell**, Raleigh, NC (US); **Brian Kinnune**, Racine, WI (US)
- (73) Assignee: **CREE, INC.**, Durham, NC (US)
- (\*) Notice: This patent is subject to a terminal disclaimer.
- (\*\*) Term: **14 Years**
- (21) Appl. No.: **29/466,391**
- (22) Filed: **Sep. 6, 2013**
- (51) **LOC (10) Cl.** ..... **26-05**
- (52) **U.S. Cl.**  
USPC ..... **D26/74**
- (58) **Field of Classification Search**

## CLAIM

The ornamental design for a troffer-style light fixture, as shown and described herein.

## DESCRIPTION

FIG. 1 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 2 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 3 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 4 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 5 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 6 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention.

FIG. 7 is a cross-sectional view along cut line 7-7 of a light fixture according to an embodiment of the present invention.

FIG. 8 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 9 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 10 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 11 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 12 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 13 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention.

FIG. 14 is a cross-sectional view along cut line 14-14 of a light fixture according to an embodiment of the present invention.

FIG. 15 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 16 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 17 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 18 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 19 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 20 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention.

FIG. 21 is a cross-sectional view along cut line 18B-18B of a light fixture according to an embodiment of the present invention.

FIG. 22 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 23 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 24 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 25 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 26 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 27 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention.

FIG. 28 is a cross-sectional view along cut line 28-28 of a light fixture according to an embodiment of the present invention.

FIG. 29 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 30 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 31 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 32 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 33 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 34 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention.

FIG. 35 is a cross-sectional view along cut line 30B-30B of a light fixture according to an embodiment of the present invention.

FIG. 36 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 37 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 38 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 39 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 40 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 41 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention.

FIG. 42 is a cross-sectional view along cut line 42 of a light fixture according to an embodiment of the present invention.

FIG. 43 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 44 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 45 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 46 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 47 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 48 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention.

FIG. 49 is a cross-sectional view along cut line 49-49 of a light fixture according to an embodiment of the present invention.

FIG. 50 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 51 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 52 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 53 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 54 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 55 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention.

FIG. 56 is a cross-sectional view along cut line 48B-48B of a light fixture according to an embodiment of the present invention.

FIG. 57 is a perspective view of a light fixture according to an embodiment of the present invention.

FIG. 58 is a left side elevation view of a light fixture according to an embodiment of the present invention, with the right side being a mirror image.

FIG. 59 is a front end elevation view of a light fixture according to an embodiment of the present invention, with the back end elevation view being identical.

FIG. 60 is a bottom plan view of a light fixture according to an embodiment of the present invention.

FIG. 61 is a top plan view of a light fixture according to an embodiment of the present invention.

FIG. 62 is a close-up left side elevation view of a portion of a light fixture according to an embodiment of the present invention; and,

FIG. 63 is a cross-sectional view along cut line 63-63 of a light fixture according to an embodiment of the present invention.

Some elements of the fixtures in some of the figures are in broken lines for illustrative purposes only and form no part of the claimed design.

The break lines in some of the figures indicate that the portions shown within the break lines form no part of the claimed design.
