(57) **CLAIM**

The ornamental design for a display panel of an electronic personal training device with a transitional graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front elevational view of a first image in a sequence for a display panel of an electronic personal training device with a transitional graphical user interface showing my new design.

FIG. 2 is a second image thereof.

FIG. 3 is a third image thereof; and,

FIG. 4 is a perspective view of the image of FIG. 2, shown on a personal training device.

The appearance of the transitional graphical user interface sequentially transitions between the images shown in FIGS. 1 to 3. The process or period in which one image transitions to another image does not form part of the claimed design. The broken lines shown in FIGS. 1, 2 and 3 illustrate portions of the display panel of an electronic personal training device with a transitional graphical user interface that form no part of the claimed design.
