(57) **CLAIM**

The ornamental design for a display screen or portion thereof with a transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with a transitional graphical user interface, showing our new design, illustrating a first image thereof.

FIG. 2 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a second image thereof.

FIG. 3 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a third image thereof.

FIG. 4 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a fourth image thereof.

FIG. 5 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a fifth image thereof.

FIG. 6 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a sixth image thereof.

FIG. 7 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a seventh image thereof.

FIG. 8 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating an eighth image thereof.

FIG. 9 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a ninth image thereof.

FIG. 10 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a tenth image thereof.

FIG. 11 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating an eleventh image thereof.

FIG. 12 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twelfth image thereof.

FIG. 13 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirteenth image thereof.

FIG. 14 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a fourteenth image thereof.

FIG. 15 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a fifteenth image thereof.

(Continued)

FIG. 16 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a sixteenth image thereof.

FIG. 17 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a seventeenth image thereof.

FIG. 18 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating an eighteenth image thereof.

FIG. 19 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a nineteenth image thereof.

FIG. 20 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twentieth image thereof.

FIG. 21 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty first image thereof.

FIG. 22 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty second image thereof.

FIG. 23 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty third image thereof.

FIG. 24 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty fourth image thereof.

FIG. 25 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty fifth image thereof.

FIG. 26 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty sixth image thereof.

FIG. 27 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty seventh image thereof.

FIG. 28 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty eighth image thereof.

FIG. 29 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a twenty ninth image thereof.

FIG. 30 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirtieth image thereof.

FIG. 31 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirty first image thereof.

FIG. 32 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirty second image thereof.

FIG. 33 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirty third image thereof.

FIG. 34 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirty fourth image thereof.

FIG. 35 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirty fifth image thereof.

FIG. 36 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirty sixth image thereof; and,

FIG. 37 is a front view of the display screen or portion thereof with the transitional graphical user interface, illustrating a thirty seventh image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-37. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken line showing of the display screen and the remainder of the graphical user interface forms no part of the claimed design.

Subject matter shown in broken lines is environmental and forms no part of the claimed design. However, Applicants reserve the right to claim any combination or subset of subject matter, whether shown in broken lines or solid lines, in this application or in one or more divisional applications thereof.
