(57) **CLAIM**

The ornamental design for film for packaging production, as
shown and described.

DESCRIPTION

FIG. 1 is a bottom plan view of the film for packaging
production showing our new design; and,
FIG. 2 is a top plan view of the film for packaging produc-
tion. The rounded rectangular section aligns with the simi-
larly shaped section seen in FIG. 1.

The rectangular portion of the film that is seen in the center
of the figures is formed as a double layer of material, as are
the larger, irregularly shaped flanking regions. The film has
a minimal thickness, and the increased thickness of the
second layer would not be clearly distinct in a side view.
The broken lines represent boundaries of the film and form
no part of the claimed design. The dash-dot lines represent
score lines cut in the film.
