(57) **CLAIM**

The ornamental design for a reversible case with device-holding cradle for a mobile communications device, as shown and described.

**DESCRIPTION**

FIG. 1 is a front perspective view of a reversible case with device-holding cradle for a mobile communications device

showing my new design with the cover portion in a first open position and showing a first side of the cover portion.

FIG. 2 is another front perspective view thereof with the cover portion in a second open position and showing a second side of the cover portion.

FIG. 3 is a rear perspective view thereof with the cover portion in the first open position and showing the second side of the cover portion.

FIG. 4 is another rear perspective view thereof with the cover portion in the second open position and showing the first side of the cover portion.

FIG. 5 is a front elevation view thereof with the cover portion in the first open position and showing the first side of the cover portion.

FIG. 6 is a rear elevation view thereof with the cover portion in the first open position and showing the second side of the cover portion.

FIG. 7 is another front elevation view thereof with the cover portion in the second open position and showing the second side of the cover portion.

FIG. 8 is another rear elevation view thereof with the cover portion in the second open position and showing the first side of the cover portion.

FIG. 9 is an end view thereof with the cover portion in the first open position.

FIG. 10 is another end view thereof with the cover portion in the second open position.

FIG. 11 is an enlarged fragmentary view thereof taken from FIG. 9 to more clearly disclose the appearance of the case and the contrast between the first and second sides of the cover portion.

FIG. 12 is a rear elevation view thereof with the cover portion in a first closed position and showing the second side of the cover portion.

FIG. 13 is a front elevation view thereof with the cover portion in the first closed position and showing the second side of the cover portion.

FIG. 14 is a front perspective view thereof with the cover portion in the first closed position and showing the second side of the cover portion.

FIG. 15 is a rear perspective view thereof with the cover portion in the first closed position and showing the second side of the cover portion.

(Continued)

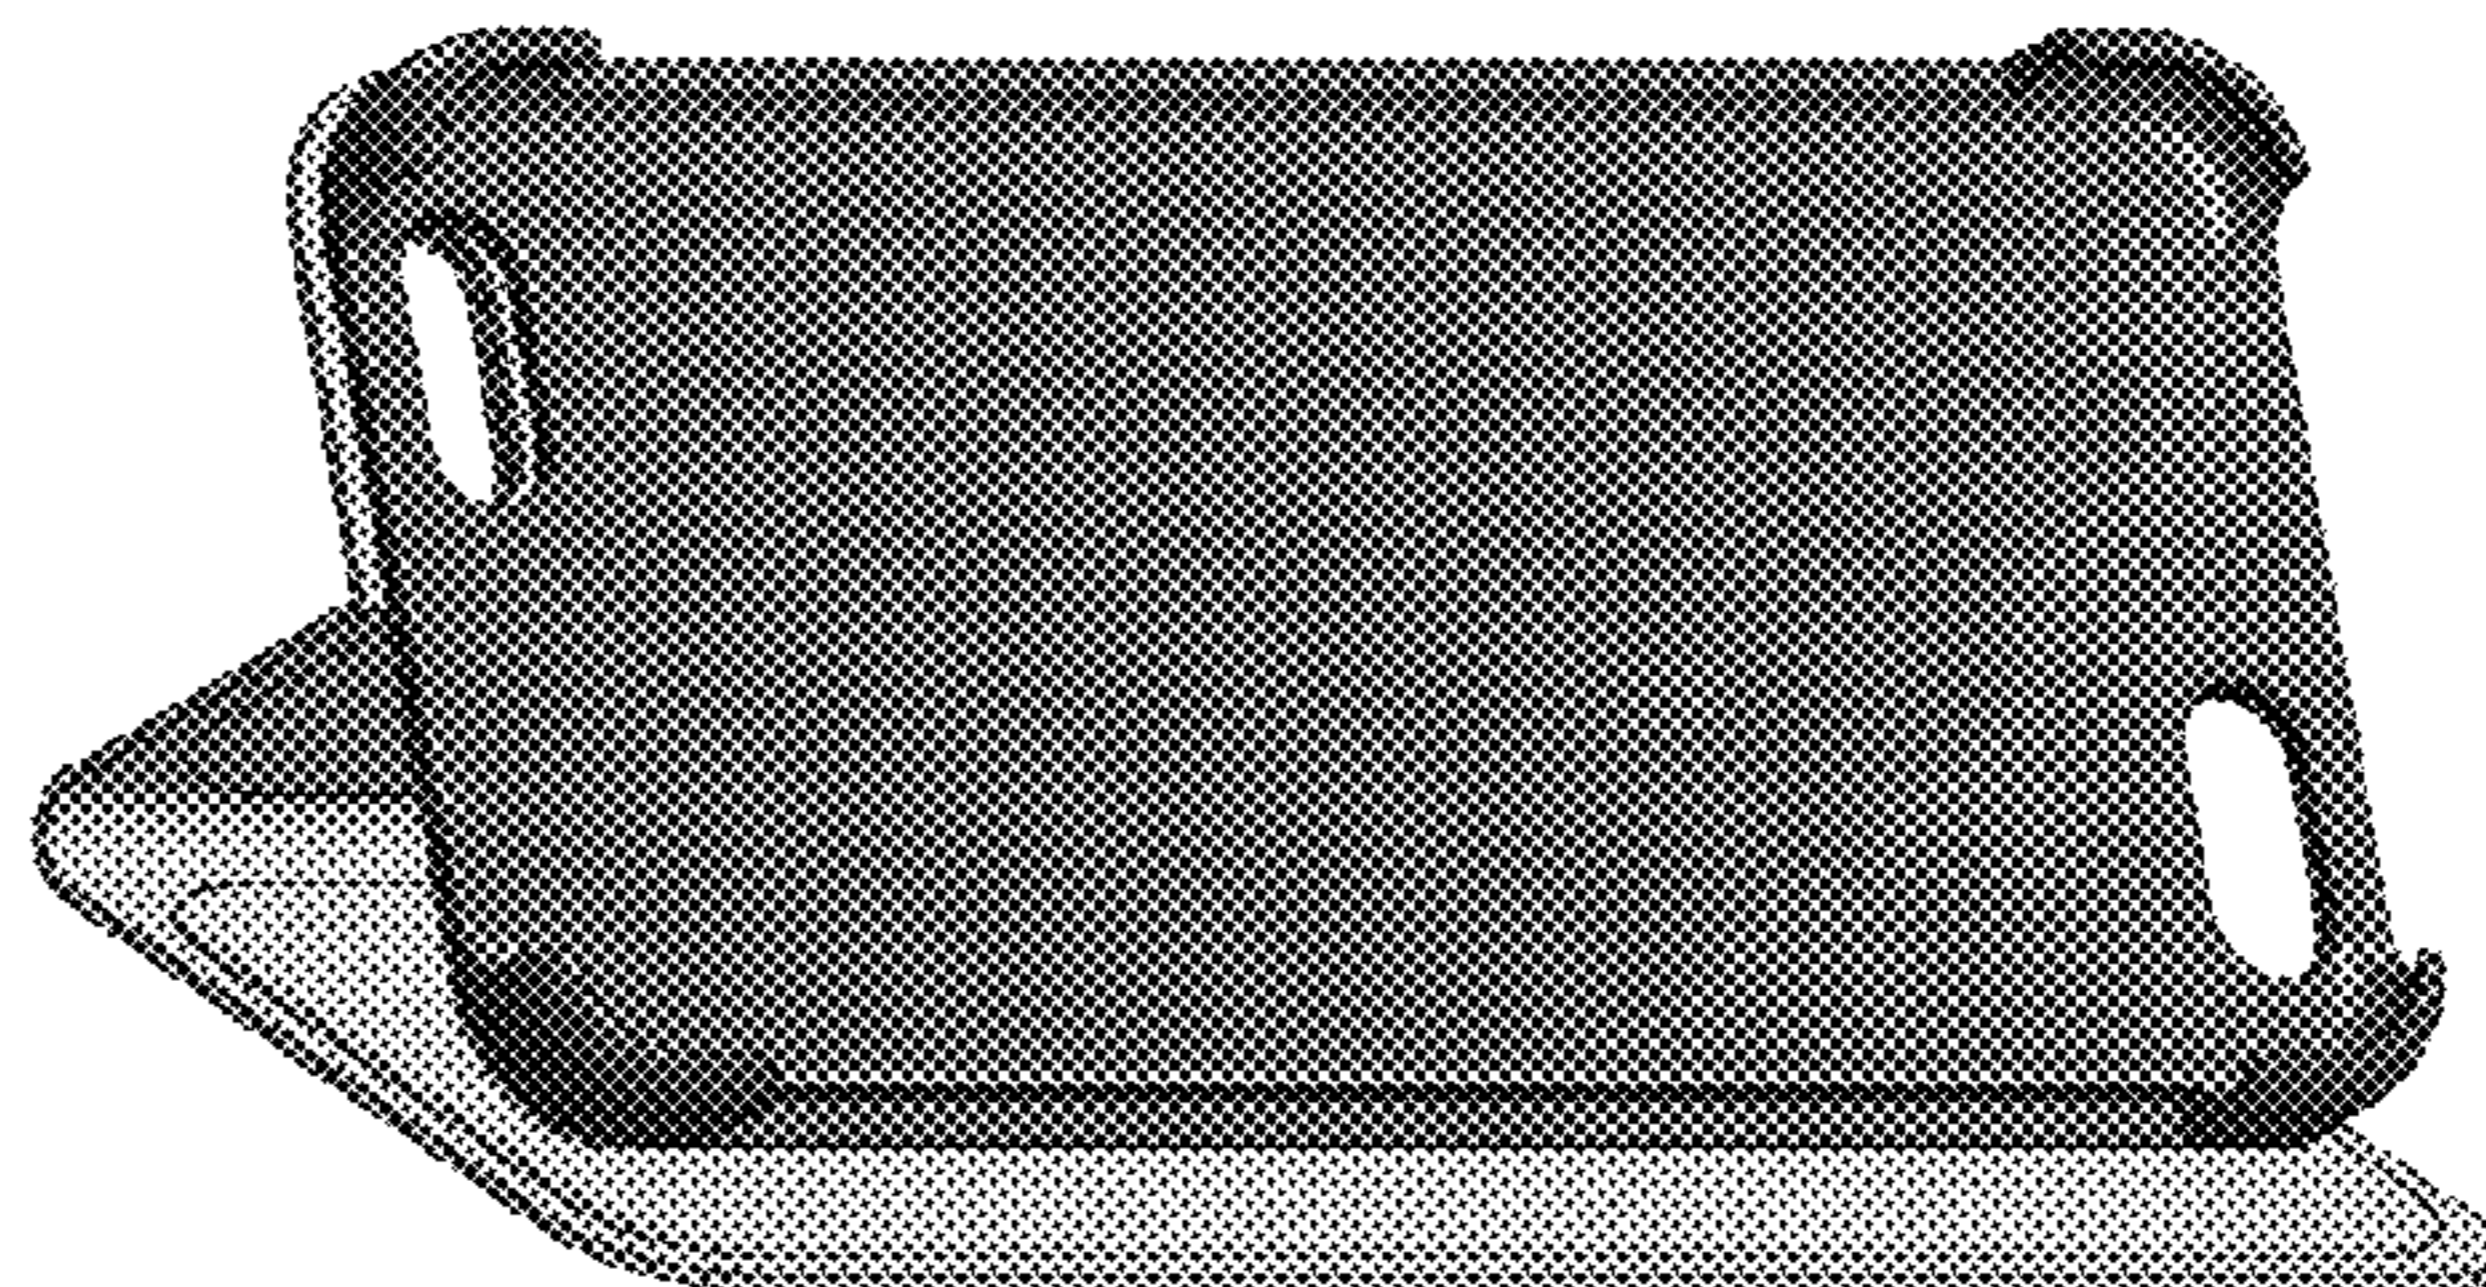

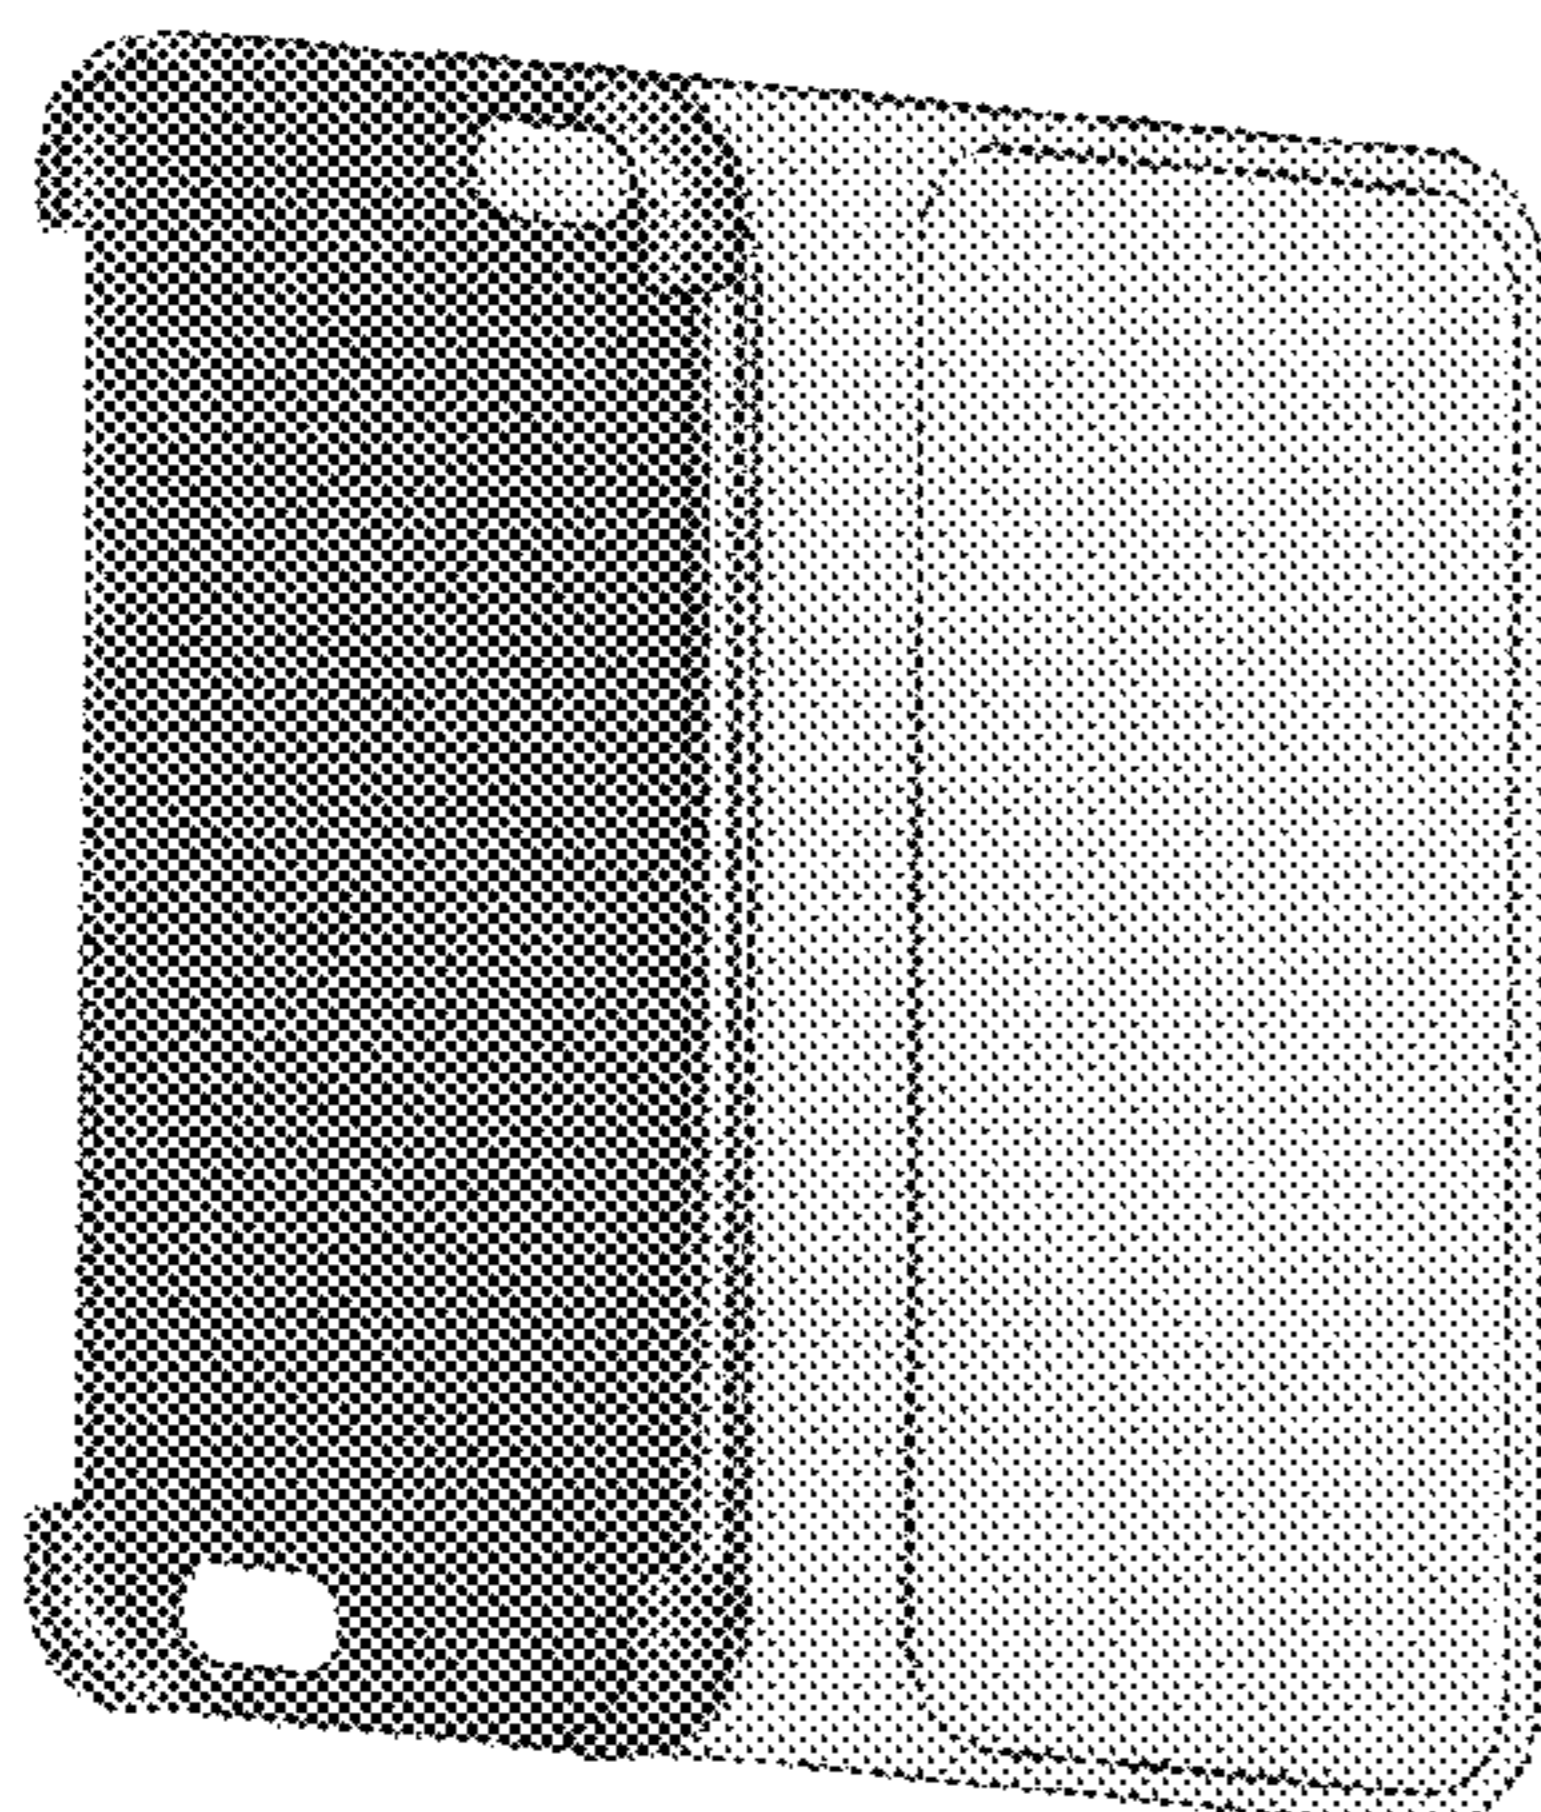

FIG. 16 is an end view thereof with the cover portion in the first closed position.

FIG. 17 is a right-side elevation view thereof with the cover portion in the first closed position.

FIG. 18 is another end view thereof with the cover portion in the first closed position.

FIG. 19 is a left-side elevation view thereof with the cover portion in the first closed position.

FIG. 20 is a front perspective view thereof with the cover portion in a first alternate configuration; and,

FIG. 21 is a another front perspective view thereof with the cover portion in a second alternate configuration.

The broken lines in Figure Nos. 9 and 11, which form no part of the claimed design, encircle a portion of the claimed design that is shown on an enlarged scale in FIG. 11.
